GARDEN

ANNUAL 1902

Vittata

Prince of Orange

Formosissima

Johnsonii

See Inside of Cover for Descriptions

J. ROSCOE FULLER & COMPANY,
SEEDSMEN & FLORISTS,
FLORAL PARK, NEW YORK.

AMARYLLIS—Commonly Called Queen Lilies. SEE FRONT COVER . . .

BULBS OF AMARYLLIS.

Our bulbs are large and will produce flowers in 90 days from time of planting.

Formosissima. There is hardly a flower known to cultivation which has such a deep, rich, velvety crimson color—a color so intensely brilliant as this. It is a free bloomer, and succeeds well either in pots or in the open ground, and blooms very soon after planting, often before its leaves start. **10c., 3 for 25c.**

Johnsonii. Very large flower, of a rich crimson-scarlet color, striped with white. **30c. each, 2 for 50c.**

Vittata. Very large flower and similar to Johnsonii, but a very much whiter ground, as shown in colored plates. **30c. each, 2 for 50c.**

Prince of Orange. The nearest clear yellow or orange that we have, with a slight marking of green in the throat. **30c. each, 2 for 50c.**

Longifolia (Hardy). This is a great favorite, as it is hardy out of doors, and once planted it increases in size and beauty each year. **Mixed colors, 10c. each, 3 for 25c.**

Hybrid Amaryllis. Mixed. Beautiful striped, flaked and feather varieties; from the leading European specialists. **20c. each, 3 for 50c.**

One each of the 6 Amaryllis for 90c.

The Amaryllis is the grandest and noblest flower that grows, but the process of producing the bulbs is so slow that heretofore choice varieties (such as we offer) have been so expensive that it has been impossible for us to offer them to our friends at a reasonable figure. We had the good fortune last year of making a contract for **Bulbs and Seed** with the best Amaryllis grower in Europe, and are now able to offer varieties that a short time ago sold all the way from \$15 to \$40 each.

We are especially glad to be able to offer you seed gathered from this grand collection, and wish to state that we are the only house offering this choice strain of seed, as we took the grower's entire crop. Bulbs grown from seed will not bloom the first year, but there is no cheaper way of getting a grand collection of plants, and as the plants live for a great many years, we especially recommend planting seed as the wait of a year or so is nothing compared with the pleasure you will have for the rest of your life, but for immediate flowers plant bulbs. Directions for planting with each order. **Per Pkt., 10c., 3 for 25c.**

OUR GREAT SURPRISE COLLECTION OF SEEDS, BULBS AND PLANTS 50 CENTS.

\$3.00 or \$4.00 Worth of the Choicest Flowers for Only 50 Cents.

We are obliged to grow enormous stocks of all kinds of Plants, Bulbs and Seeds, generally more than is necessary, to make sure of having enough. It is our custom, after the heavy Spring business is about over in May, to take this surplus stock of various good things, make it into "Surprise" Collections and offer them to our customers, giving them five or six times the value of their money. In fact, the "Surprise" is in the great amount of fine things one gets for the money paid. These collections cannot be sent out until about the middle of May, and will be entirely of our own selection from the kinds of which we have a surplus. No collection will be made up for less than fifty cents, and from that up to any amount the purchaser may desire. They will be sent free by mail. All "Surprise" Collections ordered previous to May 1st will be booked and shipped then, but we can continue sending them up to the first of July. We advise our friends to invest fifty cents or more in this collection. We can guarantee that all will be pleased.

"SUCCESS WITH HOUSE PLANTS."

BY LIZZIE PAGE HILLHOUSE.

A VALUABLE BOOK ON PLANT CULTURE.

Scores of books and booklets there are on this subject, but it has been reserved to our author to write a text-book, the result of her own practical experience, that, faithfully followed, will enable every lady to keep her home delightful with dainty and fragrant flowers the year through.

The volume is written by a woman for women, in plain, concise language, easily understood, and the book has the special merit of giving directions which can be readily followed, the methods prescribed being of the simplest, and the material suggested to be used easily within reach of all.

Profusely illustrated, with complete and ready reference index to all plants enumerated. **over, \$1.10; paper cover, 60c., by mail, postpaid.**

INFORMATION FOR CUSTOMERS.

All goods are sent **postpaid** by mail and **charges prepaid** when sent by **express**, and delivery guaranteed in good condition.

How to Send Money. Remittances may be made at our risk if sent in the following forms: **Bank Draft, Check, Express Money Order, Registered Letter** or by **Post Office Money Order**, application for which we herewith enclose. We strongly recommend this latter form of remittance, as all post offices are now money order offices, and there is absolutely **no chance of loss**, as postmasters will issue duplicates of lost money orders promptly. All that our customers are required to do is to fill in the amount that they wish to send, with their name and address, and hand the same to your postmaster, for which he will give you in exchange the Money Order desired, the price of which you may deduct from your order to us, **thus we stand the expense.** Silver or stamps may be sent for **small amounts**, but at sender's risk unless registered.

SPECIAL DISCOUNTS.

On all orders amounting to \$1.00—20c. Extra may be selected.
On all orders amounting to \$2.00—40c. Extra may be selected.
On all orders amounting to \$3.00—70c. Extra may be selected.
On all orders amounting to \$4.00—\$1.00 Extra may be selected.
On all orders amounting to \$5.00—\$1.25 Extra may be selected.

THE BEST FRUITING ORANGES.

The large-fruited and large-growing *Oranges* and *Lemons*, budded on the *Trifoliata Orange*, dwarfs them into lovely little bushes for pots or tubs; but they will be just as fruitful and bear just as large and fine-flavored fruit as the big trees in Florida. These miniature trees loaded with full-sized fruits are exceedingly ornamental. They also begin blooming at a very early age. *In fact, these dwarf trees begin to bloom when no larger than a Geranium;* and plants only 15 inches high have produced at one time 150 buds and blossoms. But care must be taken or these little plants will kill themselves bearing. All the fruits except 2 or 3 should be picked off until the trees are 3 years old.

KIN-KAN OR KUMQUAT ORANGE.

The plants begin to bear just as soon as they have wood enough to hold fruit, and are loaded with fruit and flowers every year. We have had little bushes only 20 inches high carrying upward of 100 oranges. We have put in dormant buds in the Fall that started growth the following March, bloomed and set fruit in June, which ripened in the Fall—only one year from the time the buds were inserted! A small tree, not more than six feet high and five feet through bore over 2,000 fruits, and this is by no means an extraordinary yield for this sort. The branches are slender without thorns, the leaves narrow and oval, and the plant assumes a fine shape. As a pot plant it will create a sensation everywhere grown. **Price, strong plants, will fruit first year, 35c. each.**

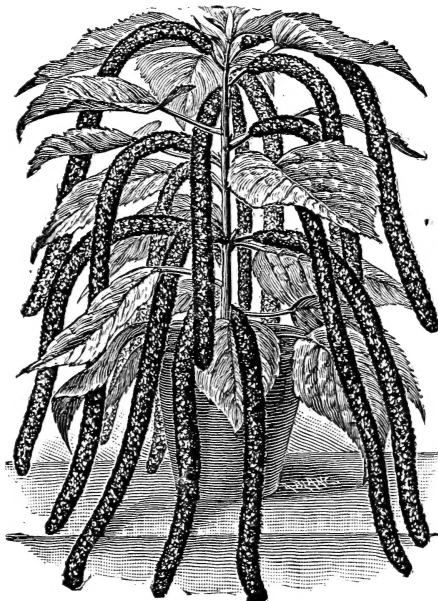

MANDARIN ORANGE.—(Willow-Leaved.)

One of the dainty and elegant "*Kid Glove*" *Oranges*, so-called because the skin and sections part so readily that they may be eaten without removing one's gloves. Fruit small and flattened, yellow, spicy and very delicious. Elegant for pots. **Price, strong plants, will fruit first year, 30c.**

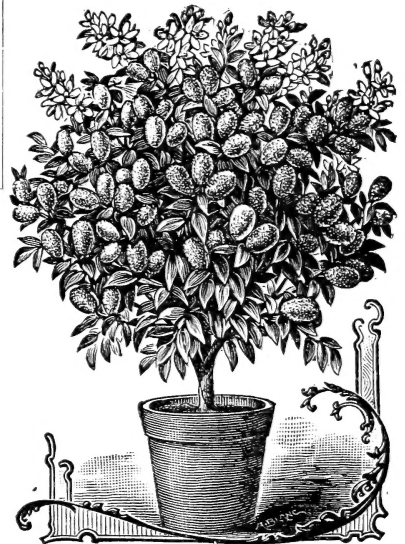

ACALYPHA SANDERI.

This wonderful plant was first offered to the public last Spring under various names, such as "*Chenille Plant*," "*Philippine Medusa*," "*Comet Plant*," "*Tassel Plant*," and a half-dozen other names purely local.

It is the most distinct and striking ornamental plant introduced in many years. It is a native of the South Sea Islands, and may well be called the forerunner of the rare and beautiful tropical plants from our new possessions in the Philippines. It is so unique and odd and yet so beautiful, so brilliant in color and startling in effect, that everybody who sees it wants it. It is of easy and rapid growth and **blooms continuously.** The plant is of branching habit, healthy foliage and the flowers are most remarkable. **The flower spikes,** which appear in pairs from the axils of the leaves, **grow from two to three feet in length.** They are of **bright crimson color,** and look exactly like a long piece of crimson scarlet cord, drooping and mixing among the bright green foliage with charming effect. It will be extensively used as a pot and window plant everywhere, as plants will bloom when not over three inches tall and continue to bloom throughout the year. For bright and curious effect it has no equal. Wherever the plant has been exhibited in this country and in Europe it has attracted universal attention and admiration. It has received silver and gold medals and premium certificates at the Flower Shows this Autumn. **Price, strong plants, ready to bloom, 20c., 3 for 50c.**

Acalyphi Sanderi.

Kumquat on Kin-Kan Orange.

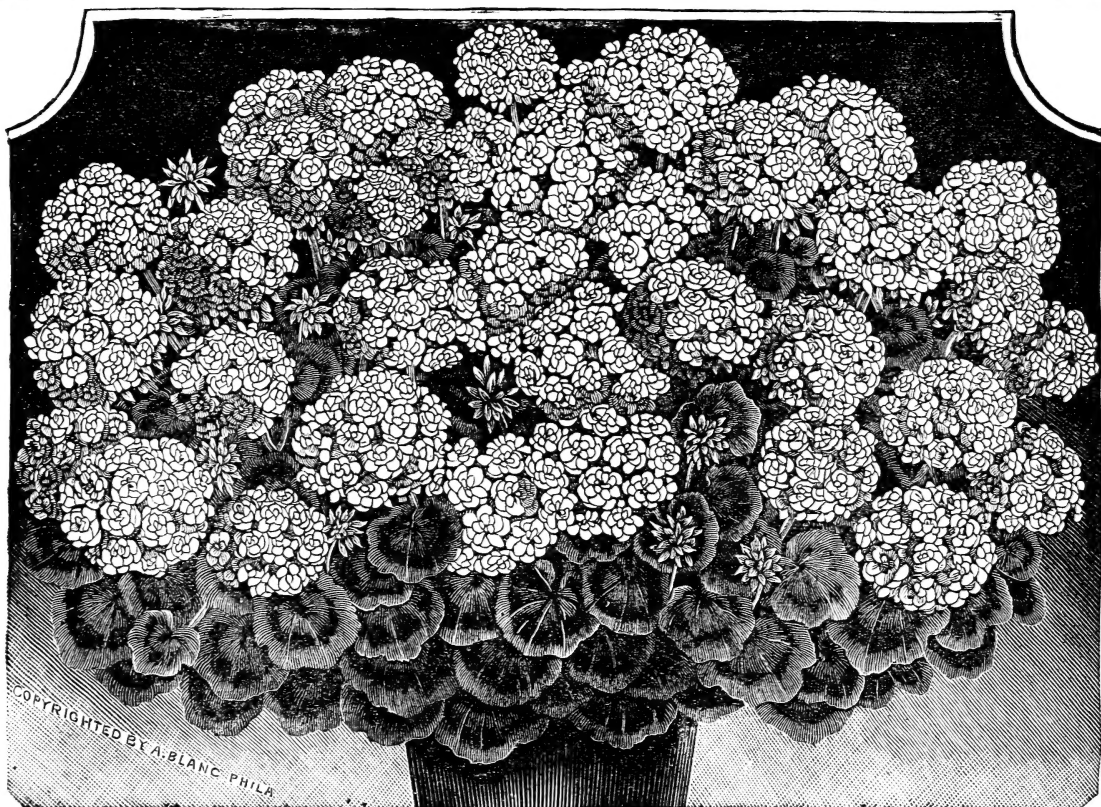

Dwarf Banana Fruiting in a Tub.

BANANAS.

For Winter Fruiting.

Everybody has doubtless seen and probably tasted the fruit of the Banana. But very few know that the plants can be grown in the North as successfully as Cannas or even Corn. They make grand decorative plants grown in large pots, kegs or tubs of rich soil. But they are particularly valuable for open ground culture in the center of beds of foliage plants, moist situations, etc.

Orinoco Banana (var. Sapientum). A grand sort for bedding out; grows very large, producing a magnificent effect. Very hardy, and should be grown everywhere as an ornamental plant. **20c., 3 for 50c.**

Geranium "La Favorite."

15 OF THE VERY BEST NAMED GERANIUMS.

Marquese de Montfort. Deep, brilliant, carmine-purple; one of the most novel and striking shades yet seen; excellent grower and profuse bloomer; fine large floret, massive truss held well up and erect; foliage deeply zoned, exceptionally novel; this variety was extensively used the past season as a bedder and gave general satisfaction. **15c. each, 3 for 40c.**

Gertrude Pearson. One of the older sorts that is always scarce; a fine dwarf habit, with foliage attractively zoned; color pure rose-pink with a conspicuous white blotch on the two upper petals; the flower is of beautiful form and largest size; a profuse bloomer; trusses held erect, well above foliage. **15c. each, 3 for 40c.**

Jean Viaud. Very large semi-double blooms borne in large trusses well above the foliage; individual floret large; color bright rosy pink with distinct white blotch in the center; habit dwarf, compact, very vigorous and exceptionally free blooming; foliage clear, deep green with distinct bronze-green zone; probably the best pink Geranium for bedding yet introduced. **15c. each, 3 for 40c.**

Pansy Geranium. This new and beautiful Geranium is of easiest growth, dwarf in habit and literally covered with flowers all the time; and, as it requires little or no attention, it is invaluable as a window plant. The coloring and marking of the flowers are most extraordinary; light pink, white, dark purple and black, etc., almost rivaling the Pansy in uniqueness of flower. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. **Strong Plants, 20c. each, 3 for 50c.**

Surprise. Double, deep crimson pink, with pure white center; similar in flower, truss and habit to the Jean Viaud, save the color, which is deeper and more effective; fully as striking and valuable as above. **20c. each, 3 for 40c.**

Skeleton, Leaf Rose-Scented. The most popular scented Geranium. It is the same as the rose in all points except the leaf is more deeply cut or fern-like. The leaves are used for designs and bouquets. **15c. each.**

Alphonse Ricard (Semi-Double Scarlet). Color deep vermilion scarlet, compact habit, strong vigorous grower, broad deeply zoned foliage, large trusses of flowers, borne on very heavy stalks. **15c. each, 4 for 50c.**

La Favorite. In the La Favorite we have the finest double white Geranium ever introduced, and unlike other double white Geraniums it is suitable for bedding and flowers as profusely as the best single varieties. The perfect double flowers are unsurpassed for cut flowers. They are borne in large trusses and are spotless, snowy white, retaining their pure whiteness even in the heat of Summer. **15c. each, 3 for 40c.**

Mrs. Parker (Silver Leaves). A beautiful double-flowering, ivy-leaved in which we have the only double-flowering variety in the silver-leaved section. While the foliage is deep green, with a broad border and margin of pure snow white, the flower is perfectly double and of a clear bright pink, a combination at once novel and beautiful in the extreme. **15c. each, 3 for 40c.**

Madam Bruant. It is entirely distinct from any other Geranium in cultivation; the plant is a very vigorous grower and very free flowering. Center of flower is white, veined with carmine lake, and each of the five petals bordered with bright Solferino. **15c. each, 4 for 50c.**

Black Knight. The very best bedding variety; very robust grower and always in flower; color dark red, almost black. **15c. each, 5 for 50c.**

Beaute Poitevine. Very large and semi-double florets of the most beautiful and distinct form and borne in immense trusses; very free bloomer, and as a bedding variety it has no equal in its color, brilliant salmon. **15c. each, 2 for 25c.**

Mrs. Taylor, Rose Fragrance. With large trusses of scarlet flowers. Very delightful. **15c. each, 2 for 25c.**

Double New Life. A very vigorous grower and of easy culture. The outer florets are large and a bright scarlet; in the center of these appears another semi-double floret, pure white in color, making a most beautiful contrast in color, having the appearance of being produced artificially. **15c. each, 3 for 40c.**

Peppermint Geranium. The most remarkable fragrant-leaved Geranium ever offered. The leaf is a beautiful light green, soft as velvet, and with such a delightful peppermint fragrance that a single plant will perfume a large room. Flowers carmine red. **15 each, 3 for 40c.**

One each of 15 Geraniums \$1.50.

20 NAMED GERANIUMS FOR \$1.00 POSTPAID

For \$1.00 we will send 20 Named Geraniums all labeled, large plants ready to bloom—just enough for a bed or border.

FLOWERING FUCHSIAS.

Phenomenal Fuchsia. The grandest of them all. Phenomenal is the largest flowered Fuchsia in cultivation. The plant is a tall grower, branching like a tree; the leaves are dark, glossy-green, with veins of dark crimson, giving the foliage a rich, ornamental appearance. The flowers are of enormous size, a single flower measuring three and a half inches across; sepals bright scarlet, with rich violet purple corollas, very double. **15c. each, 3 for 30c.**

Black Prince. This is, without question, the very finest Fuchsia grown for the amateur to cultivate. It makes a shapely bush, is robust in growth, free from disease and insects, and is probably the freest in blooming. Blossoms of a beautiful waxy-carmine or pink color. Certainly a plant of easy culture. **15c. each, 3 for 30c.**

Trailing Queen. This Fuchsia is an entirely new departure, differing from all other large flowering varieties in its habit of growth, as it is a trailing vine. The young plants, as they commence growth, creep out to the edge of the pot, and then go trailing downward. It continues growing and branching in this way until the vines are a solid wavy mass of the most elegant foliage and flowers. The flowers are borne in large, drooping clusters; very large long, graceful. **15c. each, 3 for 30c.**

Storm King. Its graceful, weeping habit, and its superlatively beautiful flowers, more freely borne than those of any other sort, make it the most valuable of Fuchsias. It is always in bloom, often as many as 200 buds and blossoms on a plant at once. The branches droop most gracefully, and the blossoms are frequently as large as tea cups. The buds for two weeks before they expand are balls of glowing scarlet crimson. When expanded the enormous double flowers are almost pure white, capped by a calyx of glowing scarlet. **15c. each, 3 for 30c.**

The set of 4 Fuchsias, 40c.

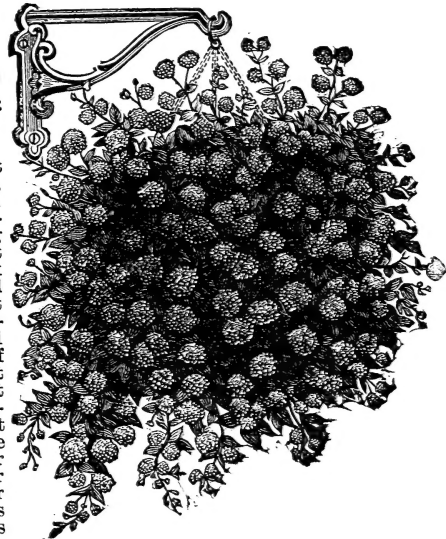

Fuchsia Phenomenal.

WEeping LANTANA.

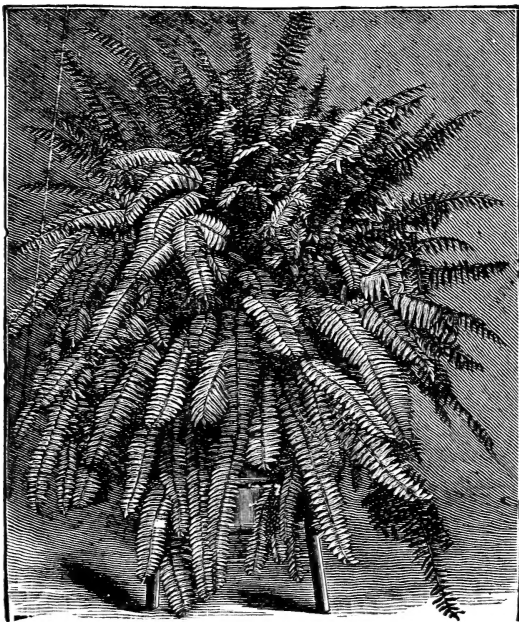

A New Weeping Plant of Great Beauty.

The plant has a most graceful drooping habit, grows very rapidly, and blooms continually Summer and Winter, producing large clusters of the most delicate lilac or rosy pink flowers; foliage a beautiful dark green. A single plant on August 1st had 590 clusters of flowers on it, and Dec. 1st had 390 clusters of flowers on, which proves it one of the most persistent bloomers, and when planted out in open ground it produces a great abundance of leafy vines which cover the ground with their pretty foliage and bear such a profusion of flowers that the whole bed seems a sheet of rosy bloom.

10c. each, 3 for 25c.

Weeping Lantana.

BOSTON FERN.

Nephrolepis Exaltata Bostoniensis.

This grand new Fern has become the most popular decorative plant of the year. It is one of the very few plants that will thrive under ordinary house care. The Fronds droop gracefully over the edge of the pot, and as it is a very rapid grower the fronds soon attain the length of from 4 to 6 feet, which gives it the appearance of a weeping fountain of green, and it becomes larger and handsomer from year to year.

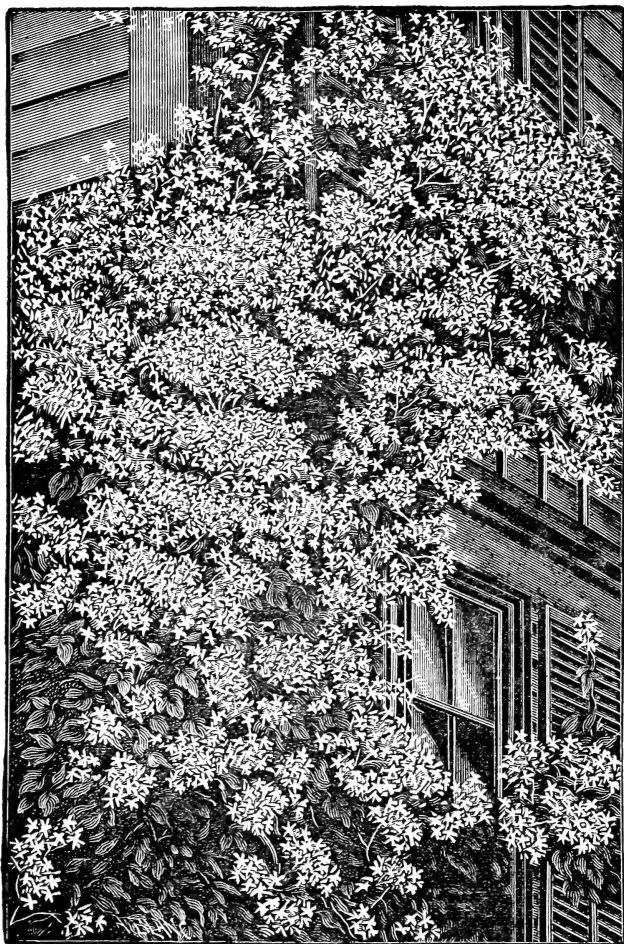

A single plant exhibited recently in New York measured 10 feet in diameter **Large plants, 20c., 3 for 50c.**

PARROT'S FEATHER.

A lovely mossy plant with long trailing stems covered with plummy feathery foliage, of the freshest, loveliest green imaginable. Fine for aquariums, where few plants do well, and makes the water much more healthful for the fish. Grows nicely also in water tubs or ornamental pools, and is much admired when grown in hanging pots or baskets of soil. It grows as well in soil as in water, if it is kept well watered. It is one of the most charming trailing and drooping plants, and grows so rapidly that it can be cut with the greatest freedom. One of the most novel ways of growing it is to plant it in a water-tight hanging basket so water can be kept standing on the surface of soil, and the plant will trail down over the side in the most charming manner.

10c. each, 3 for 25c.

Clematis Paniculata.

CLEMATIS.

This beautiful flower may well be called the Prince among all hardy flowering vines, and we presume all of our customers who have seen the magnificent masses of flowers produced by this grand climber have promised themselves to plant one at the very next opportunity. It is especially adapted for house fronts, trellises or open lawns, where it can be trained as a creeper to cover rocks stumps or mounds. We offer four of the best varieties, strong, field-grown plants, on their own roots.

New Sweet Scented Clematis Paniculata. One of the finest additions to our list of hardy climbers that has been made in years. A vine of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy green foliage. The flowers are of medium size, pure white, borne in immense sheets, and of a most delicious and penetrating fragrance. It begins to bloom in August and is a mass of snow-white flowers until late in the Fall. The extreme rapidity of its growth, the showy foliage, beautiful and fragrant flowers borne so very freely, and its late blooming nature, united with an entire hardihood, serve to make this one of the most desirable and useful of climbing plants. **20c., 6 for \$1.00.**

Mad. Ed. Andre. This is the nearest approach to a bright red Clematis and has been called the Crimson Jackmanii. The plant is a strong, vigorous grower and very free in bloom. Color a distinct crimson red; a very pleasing shade and entirely distinct from all other varieties. **Strong plants, 30c., 3 for 75c.**

Jackmanii. The flowers, when fully expanded, are from four to six inches in diameter; intense violet purple, with a rich velvety appearance, distinctly veined. It flowers continually from July until cut off by frosts. **Strong plants, 30c., 3 for 75c.**

Henryi. A very strong grower, and very hardy, producing a great profusion of pure white flowers. The very best white. **30c. each, 3 for 75c.**

The set of 4 Clematis, 90c.

CROTONS.

These are but little known among general collections of house plants, yet they are not exceeded in beauty of foliage by any foliage plant, not even Palms. The leaves are long, narrow and graceful, and are most charmingly spotted and variegated. The sorts we offer are hardy and vigorous and will succeed in any window. **20c. each, 3 for 50c.**

HIBISCUS.

Cooperii Tricolor.

This is one of the most beautiful variegated foliage plants that we know of, and should be in every window collection. The

Croton.

plants, which grow about 20 inches high, are covered with the most artistically variegated foliage. Colors white, brown, green, red, etc. **15c. each, 3 for 30c.**

GRAND NEW SPIREA GLADSTONE

NOW OFFERED FOR THE FIRST TIME.

This is a genuine triumph in Spireas, and is destined to become the most popular plant for cut flowers introduced in many years. Each plant produces from 15 to 25 spikes of pure white flowers, opening well above the foliage. It is entirely hardy and if planted in open ground it will increase in size and beauty from year to year, and will produce enormous quantities of flowers suitable for cutting. Planted in pots it blooms in March and April and is a very desirable house plant, the foliage resembling our handsomest ferns. **Strong plants, 20c. each, 3 for 50c. Extra large plants for quick bloom, 50c. each, 3 for \$1.25. Enormous field clumps by express, \$1.00 each, 2 for \$1.75.**

Red Spirea.

HARDY FLOWERING SHRUBS.

Red Spirea.—*Anthony Waterer.* Is of Japanese origin, and when scarcely three inches high begins to bloom and thereafter is seldom out of flower; as a house plant nothing can equal it. In the garden it will make a plant three feet high and wide, and will be covered with heads six inches across of brilliant crimson flowers, and is of easiest growth.

White Spirea.—*Van Houttei.* Solid wreaths of snow-white flowers that cannot be counted in numbers, perfectly hardy, and in the Spring it is a weeping fountain of white.

Blue Spirea.—*Caryopteris.* One of the best new plants introduced from Japan, perfectly hardy and grows about 2 feet high. Is covered until November with dense clusters of blue flowers, elegant for cutting.

Hydrangea Paniculata Grandiflora. We believe this to be the most desirable hardy shrub in cultivation. Flowers white, borne in immense pyramidal trusses more than a foot long. It remains in flower two or three months; creates a great sensation wherever seen. It is sure to bloom finely the first season.

Forsythia. An old and valued shrub, growing four to five feet high. It is such a mass of brilliant yellow that it can be seen for a long distance, and lights up a lawn or yard as nothing else can at such an early season.

Deutzia Gracilis. Very bushy and completely covered with pure white flowers.

Wiegela.—*Variegata.* There is no more desirable shrub than this. Leaves are finely variegated, white and green, and the flowers are borne in immense masses, bending the branches to the ground. Color, blush pink. Superb.

Prices above shrubs 15 cents each, 4 for 50c.
7 for 75c.

SUPERB DAHLIAS.

New Pink Dahlia. *A. D. Livoni.* This is the most beautifully quilled soft pink Dahlia yet introduced, flowers grow in long stems and command a very high price in the cut flower market. 15c., 2 for 25c.

Floral Park Jewel. The most unique novelty in Dahlias. The great beauty of a plant laden with flowers, each of a different color, must be seen to be appreciated. Unequalled. 15c. each, 2 for 25c.

Camelliaflora. Dwarf. Flowers pure white, borne on long stems. The very best for cut flowers. 15c. each, 2 for 25c.

Mrs. Fuller (New Seedling). Flowers medium size, perfect form and a most constant bloomer, pure white, very compact grower. 15c. each, 2 for 25c.

Mary D. Hallock. A rich, deep yellow, one of the most perfect formed flowers. 15c. each, 2 for 25c.

Electric. Dazzling scarlet, profuse bloomer. 15c. each, 2 for 25c.

The set of 6 for 75c.

Mixed Dahlias. A superb mixture of new and rare sorts, and in this you get the finest mixture ever sent out by any seedsman. 10c. each, 3 for 25c., 12 for \$1.00.

OXALIS ORTGIESI.

Few new plants will give better satisfaction than this, as it is a perpetual bloomer. It is in full bloom every day of the year. It is a shrubby plant like a Geranium or Fuchsia, without bulbs, in which respect it differs from other Oxalis. It grows 12 to 18 inches in height, branching freely, and loaded at all times with clusters of bright golden star-shaped flowers. Beautiful as the flowers are, it is still a splendid plant without them, on account of its highly ornamental foliage. The leaves are three lobed, dark olive green above and a beautiful shining metallic crimson purple underneath, with wine-colored stems. 15c. each, 2 for 25c.

BABY PRIMROSE.

It blooms in thumb pots when the leaves are scarcely one or two inches high and continues to bloom for ten months in succession, forming dense clumps of foliage crowded with dozens of long flower spikes, dainty and graceful, of a most pleasing rose color, with eye or center of pale gold. They are carried in tiers on erect but delicate stems, and positively remain fresh for two weeks after being cut. It is unequaled in keeping qualities. Plants ready to bloom, 10c., 3 for 25c.

Seeds, per Pkt., 15c.

Oxalis Ortgiesi.

Baby Primrose.

6 NEW CARNATION PINKS.

Lawson. This famous Carnation was bought last year for \$30,000, the highest price ever paid for a flower of any kind. A standing challenge of \$5,000 to produce its equal within a year failed to find one, so it still remains undisputedly the best in the world. The flowers are the largest, deepest, best formed. The stems are the longest and strongest. The color, purest rose pink, which illuminates splendidly under artificial light. 20c., 4 for 60c.

New Striped Carnation.—Olympia. The largest monthly Carnation yet produced, well-grown flowers, measuring $3\frac{1}{4}$ inches across. The color is clear glossy white, with delicate pencillings of bright scarlet running through the petals. The stems are large, averaging 24 to 30 inches, a strong, vigorous, healthy grower, flowering abundantly and sustaining its quality in hot weather. Deliciously fragrant. 15c., 5 for 50c.

New Scarlet Carnation.—G. H. Crane. The best scarlet Carnation, wonderfully productive. Tested four years, it stands pre-eminent. An early, continuous, all-season bloomer, averaging 3-inch blooms; a well-formed flower and calyx, and 16 to 18 inch stems, stiff and erect throughout the whole season. Color, a clear, brilliant scarlet; of strong, robust, clean growth, making well formed, bushy plants. 15c., 5 for 50c.

General Maceo. Very full, deeply fringed flower, $2\frac{1}{2}$ to $3\frac{1}{4}$ inches in diameter, on stiff stems 12 to 18 inches long under ordinary culture. Ground color deep brilliant scarlet, heavily overlaid with maroon, making it one of the darkest and richest shades yet seen in Carnations, as rich and striking as the Meteor Rose. 15c., 5 for 50c.

General Gomez. Flower fringed and very fragrant. The color is as rich and brilliant as the "Cardinal" flower, in fact no crimson Carnation has yet been introduced possessing such a brilliant shade of color. 15c., 5 for 50c.

Lizzie McGowan. Extra large, full, perfect flowers, pure snow-white; deliciously perfumed; very free bloomer; one of the best. 15c., 5 for 50c.

The set of 6 new Carnations, 75c.

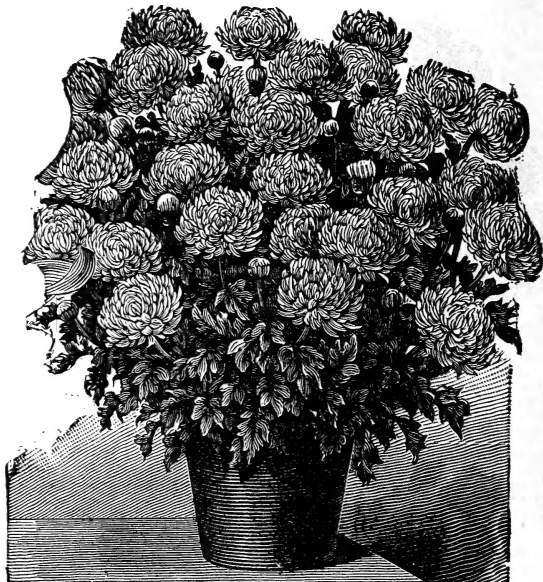

HARDY GARDEN PINKS.

New Hardy Garden Pink—Her Majesty. A splendid new variety; flowers extra large, perfectly double, clear snow white, elegantly fringed and delightfully clove scented; bears immense masses of flowers, a perfect sheet of bloom early in the spring. The plant is a compact, vigorous grower with pretty Nile-green foliage, which retains its color all winter; entirely hardy; fine for beds and edging.

New Hardy Garden Pink.—Glen Valley. Makes nice bushy plants; an abundant bloomer; fine fragrant flowers, rich maroon, beautifully variegated with white.

New Hardy Garden Pink.—Souv. De Sale. Probably the finest border Pink yet introduced, the flowers are very large and borne well up the stem; perfectly double, elegantly fringed and very fragrant. The color is a soft rosy pink.

Strong Plants, 10c. each, 3 for 25c.

NOVELTIES IN CHRYSANTHEMUMS.

The Chrysanthemum still holds the throne as the Queen of Autumn flowers. The enormous quantities sold each year show no evidence of declining popularity.

Mrs. Fred. L. Button. A magnificent pure white Chrysanthemum of the largest size; extra strong stem and splendid foliage; flowers early in September and claimed by the originator to be the earliest and best white Chrysanthemum to date.

Glory of the Pacific. An extra early pink, magnificent size and depth, with broad petals, which finely reflex, showing the clear pink color to excellent advantage; this is the best very early pink Chrysanthemum to date.

Rose Owen. Japanese incurved, grand extra early pink; clear, bright, self-pink; perfect form and finish; clean, stiff stem, with neat, bright foliage.

Robert Halliday. Fine clear yellow Japanese; immense bloom, 8 to 10 inches across, carried on a grand stiff stem with perfect foliage, making it an ideal flower.

October Sunshine. Clear soft yellow of exceedingly graceful form; good size and substance, and will be in great demand as a second early variety, being distinct in form and general character from any known variety.

Pride. The earliest large white, as early as Marion Henderson; big double flower on a stout stem, with foliage up to the bloom.

Major Bonnaffon. Soft clear yellow globular flowers, crowded full of petals, perfect every way, one of the very best kinds.

Price Chrysanthemums, 15c. each, 4 for 50c., the 7 for 70c.

HARDY CANDYTUFT.

Blooms from May until November.

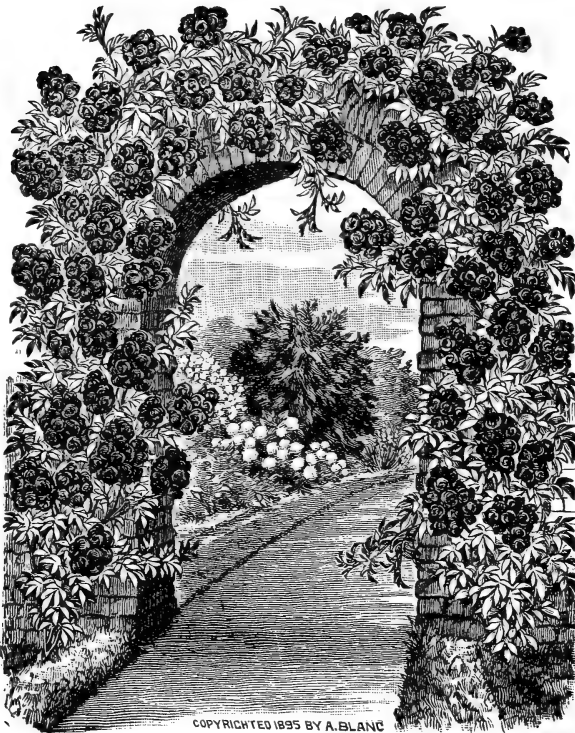

A plant of exquisite beauty, being of low, compact, spreading growth and producing its profusion of bloom in May or June, when pure white flowers are particularly scarce. Its profusion of bloom is so great that a bed of it looks at a little distance like a mass of fleecy snow just fallen. Few hardy plants will give as much real satisfaction as will this beautiful gem. Lifted late in the fall, it will bloom well in the house during the Winter. Perfectly hardy and foliage ever green. 10c. each, 3 for 25c., 12 for \$1.00.

Seed per Pkt., 5c.

HONEYSUCKLE.

Golden Leaved. Give this full sun and it is very effective. Color of leaves, gold and green. 15c. each, 2 for 25c.

Halliana. The best white monthly honeysuckle. The foliage remains green nearly all Winter. 15c., 2 for 25c.

COPYRIGHTED 1895 BY A. BLANC

Crimson Rambler**Everblooming Rose.**

ROSES.

While our list of roses is small compared with many other houses, it nevertheless contains the very best varieties for general cultivation that have yet been introduced.

Climbing Roses.

Crimson Rambler. We consider this the most wonderful of all the new roses. We have had this Summer branches seven feet long, loaded down with large clusters of these brilliant red roses. One would hardly believe it possible that so many could be produced on one shoot. A superb climber; cannot be excelled, while it is also magnificent in bush form. One of the striking characteristics of this rose is its remarkable color, which is of the brightest crimson and remains so to the end. The flowers with which the plant is covered are produced in large trusses of pyramidal form, carrying thirty to forty flowers, which remain on the plant a long time.

White Rambler. Of German origin, and in habit of growth, foliage, manner of blooming, form of flowers and hardiness it is said to be identical with *Crimson Rambler*, of which it is a blood relative, but that the flowers are pure white and sweetly scented.

Yellow Rambler. The flowers are borne in immense clusters, after the same manner as the *Crimson Rambler*, often as many as **150 blossoms in a bunch**, and the trusses have the same handsome pyramidal shape as those of the *Crimson Rambler*. The color is a decided yellow.

Pink Rambler. Originated by the same nurseryman who produced *White Rambler* and is of the same blood. What is said of *White Rambler* applies equally to this, except the color of the flowers is pink.

Strong plants, 15c. each; the set of 4 for 40c.

Hybrid Tea Roses.

Hardy with protection.

Pink La France. Beautiful pale pink.

Red La France. A much deeper pink than the above, hence it is called **Red**.

White La France. Pure snow white.

Meteor. Very double and a rich glowing crimson.

Strong plants, 10c. each; the set of 4 for 30c.

Moss Roses.

Are perfectly hardy in open ground. The moss-covered stems and buds show off the delicate beauty of the blossoms.

Blanche Moreau. Perpetual bloomer. Pure white.

Princesse Adelaide. Lovely bright pink.

W. N. Cranston. Bright crimson scarlet.

Strong plants, 15c. each; 3 for 40c.

Ever-blooming Roses.

Hardy with protection.

Bridesmaid. Flowers very large and perfect form. Beautiful pink.

Bon Silene. Color deep cherry red. Noted for its size of buds.

Cornelia Cook. Pure creamy white, tinged blush.

Catherine Mermet. Clear pink. Very fragrant.

Ernest Metz. Long pointed buds, produced on long stems. Color soft carmine rose, with deeper colored centre.

Etoile de Lyon. The hardiest of all the yellow sorts and very free bloomer. Color rich creamy yellow.

Gen. Rob't E. Lee. Double rich yellow flowers borne on long stems and very free bloomer.

Hermosa. Lovely pink and extremely hardy. A great favorite.

Madame de Watteville (Tulip Rose). The very best fancy rose. Color creamy yellow, covered with rosy blush. The petals are large and each one bordered with bright crimson, very fragrant.

Niphetos. Long pointed buds of pure white.

Queen Scarlet. The very best dark red.

Sunset. Rich golden amber or yellow. Delightfully sweet. **10c. each; 3 for 25c.; 6 for 50c.; set of 12, \$1.00.**

Hybrid Perpetual Roses.

Perfectly hardy in open ground. While the Hybrid Perpetuals do not bloom as freely as Teas, they produce much larger flowers, the perfume of which is delightful.

Anna de Diesbach. Rich dazzling crimson.

Coquette de Blancches. Very double, snow white and blooms in large clusters.

General Jacqueminot. Intense velvety scarlet.

Magna Charta. Rosy pink, flushed crimson.

Paul Neyron. Largest rose known, immense double flowers of carmine pink.

Prince Camille de Rohan. The very darkest red rose known, almost black and velvety.

Vick's Caprice (Striped Rose). It is very fragrant and its color is deep pink with wide stripes of white, and very double. **10c. each; 3 for 25c.; set of 7 for 50c.**

CANNAS.

The most popular and most magnificent of all Summer flowering plants and the very finest for pot culture in Winter.

Alphonse Bouvier. Its every shoot is topped by enormous trusses of vivid crimson-scarlet flowers, a single plant sometimes showing thirty or forty at one time. **15c. each, 2 for 25c.**

Alsace. Pure white, grows from four to six feet, clear green foliage, produces from twelve to eighteen shoots from a single eye. The only white Canna in cultivation. **15c. each, 3 for 40c.**

Austria. Enormous flowers, beautiful canary yellow with a silvery hue inside slightly dotted with red. Both in foliage and flower this Canna surpasses all others. **10c. each, 3 for 25c., 7 for 50c., 15 for \$1.00.**

Burbank. Giant yellow flowers, like an orchid; fifteen to twenty spikes on a plant. **10c. each, 3 for 25c.**

Beaute Poitevine. Three and a half feet. This proved one of the best Cannas in our collection last Summer. It is of a bright, rich crimson color with erect flower spikes. It is an ideal Canna for bedding. It seems to stand severe drought better than most kinds the flowers standing up during the hottest Summer days without injury. It comes into bloom very early and blooms continuously. **10c. each, 3 for 25c., 12 for \$1.00.**

Flamingo. Immense trusses of superb deep, glowing crimson flowers. A sturdy and vigorous plant of dwarf habit, with massive dark green foliage. Good not only for bedding purposes, but also for pot culture on account of its dwarf and compact habit and perpetual blooming qualities. **10c. each, 3 for 25c., 12 for \$1.00.**

Florence Vaughan. It still remains the highest type of new French Canna flowers. The flowers are a rich golden yellow, thickly dotted with brightest red. Height, five feet. No Canna bed is complete without this perfect ever-bloomer. **15c. each, 3 for 40c.**

Maiden's Blush. Four and a half feet. Green foliage. One of the most striking of recent introduction. A good large flower and a good truss of bloom; color, clear rose pink, almost the exact shade of the Daybreak Carnation. A handsome addition on account of its novel color. **15c. each, 3 for 40c., 10 for \$1.00.**

Papa. Four feet; green foliage. Considered by many the finest red. Strong grower, throwing up immense spikes of flowers, the florets being of grand size and fine form. Color pure red; habit of plant graceful. **15c. each, 3 for 40c.**

Paul Marquant. Immense flowers in bold, shapely trusses; shimmering salmon-rose, with silvery luster of many changeable tints. **15c. each, 3 for 40c.**

Philadelphia. An ideal bedding variety of medium height; a healthy, vigorous grower with handsome foliage, and a continuous bloomer. Color, a bright scarlet crimson, very rich and velvety. **15c. each, 3 for 40c.**

Souvenir de Mme. Crozy. Five feet; green foliage; extra strong grower. The flower spikes, of which there are five to six in a stalk, are very large and full. Garnet red flowers, with broad border and large center of a brilliant yellow. **15c., 3 for 40c.**

Souvenir d'Antoine Crozy. Four feet; green foliage. This is a perfect gem, and in our estimation the finest gold-bordered variety. The flowers are large, well-rounded petals, which are of the intense scarlet-crimson, rich and dazzling, and are bordered with a broad, rich, golden yellow border. **15c. each, 3 for 40c.**

Star 91. The dwarfest Canna in existence. Grows from one to one and one-half feet. Elegant for pot culture. Color scarlet, bordered with gold. **15c. each, 3 for 40c.**

The set of 14 named Cannas \$1.25.

NEW DWARF FRENCH CANNA SEED

are fast becoming great favorites. They are easily grown and give you flowers all Summer, and when once grown, roots can be kept from year to year by putting in cellar in winter. The very best French mixed. Pkt., 5c.

YUCCA FILAMENTOSA.

A tropical-looking plant, with long narrow leaves that remain green all the year round; flower stems three to four feet high, creamy white, bell shaped flowers. **8c. each, 4 for 25c.**

APIOS TUBEROSA,

Or the Tuberous-Rooted Wistaria.

A valuable hardy tuberous-rooted climber, closely resembling the common Wistaria in vine and foliage, and having clusters of rich deep purple flowers, which have a strong, delicious violet fragrance. Plant the bulbs near a trellis, fence, tree, or any place where you may wish a climber. They grow to a great height and bloom profusely; perfectly hardy. **5c. each, 6 for 25c., 12 for 40c.**

20 NAMED CANNAS for \$1.00 Postpaid

For \$1.00 we will send you 20 varieties of Cannas, our selection, all labeled and sure to bloom, enough to plant a good sized bed or border.

SUMMER FLOWERING OXALIS

The Oxalis is the most valuable bulb we know of for edging the borders of walks or flower beds, they produce an unbroken row of foliage and flowers. They bloom very quickly after planting and every bulb will grow. We offer 3 colors, White, Light Pink and deep Pink, at **10c. per doz., 25 for 15c., 100 for 40c., 200 for 60c., 300 for 80c., 500 for \$1.00.**

FANCY LEAVED CALADIUMS.

For window boxes, house or greenhouse growing, this is one of the most decorative plants. Their rich, thrifty leaves, handsomer than Begonias, are spotted, marbled, veined and striped with white, pink and dark red. These bulbs, though comparatively rare, are easily grown, and their handsome foliage is much admired. Out of doors use a shaded location, with light soil, watering often as needed. Bulbs should be dried down and stored in a warm place during the Winter. They should be started into growth in a warm place by April 1st.

Mixed, All Colors. Our mixture is superb and contains many valuable and expensive varieties. 15c. each, 2 for 25c., 4 for 50c., 9 for \$1.00, 12 for \$1.25.

PHRYNIUM V. RIEGATUM.

Variegated Leaved Canna.

This is without doubt the grandest ornamental foliage plant in cultivation; its habit of growth is precisely like the Canna; it grows from a bulb or tuber, and may be wintered dry, like a gladiolus, or kept growing the year round as a pot plant. The Canna-like shoots grow from 18 inches to 2½ feet high, and the leaves, which are spreading and oblong in shape, are from 6 to 10 inches long and from 2 to 5 inches broad; they are a bright green, beautifully variegated with pure white, the variegations being extremely diversified. It is almost impossible to find two leaves exactly alike; in some leaves the whole area is pure white, while in others only half and in some one-third, and in others again only a few faint stripes. Price 15c. each, 3 for 30c., 6 for 50c., 80c. per dozen.

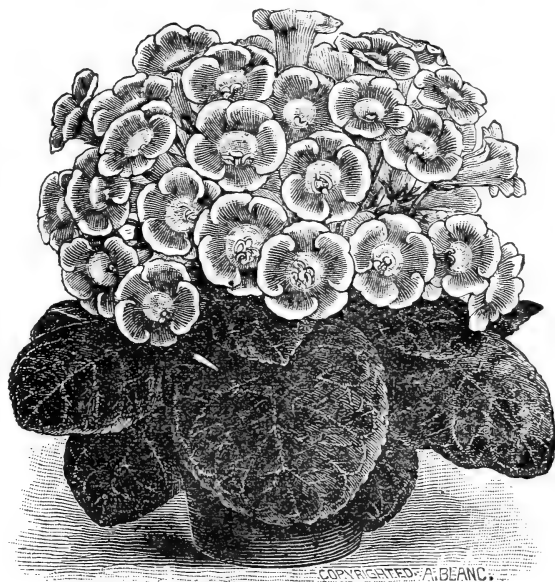

Caladium.

CALADIUM ESCULENTUM.

(Elephant's Ears.)

A grand sub-tropical foliage plant, growing four feet high and bearing immense shield-shaped leaves of the smoothest, richest green. Extra fine for groups or single specimens upon the lawn, or as borders to tropical beds, or to plant at the margins of ornamental pools, etc. 15c. each, \$1.50 per dozen.

Child's Giant Flowering Caladium. Leaves three times as large as any other Caladium, and added to this wonderful foliage are mammoth lily-like blossoms 12 to 15 inches long. Snow white and extremely fragrant. Strong plants 30c. each, 2 for 50c.

COPYRIGHTED BY A. BEAUC.

GIANT FLOWERING GLOXINIAS.

This gorgeous flower is as easily grown and cared for as many of the common flowers. They are the most magnificent table decorations we have in Summer.

Separate Colors—White, Blue, Pink. 15c. each, 3 for 35c., 6 for 60c., 12 for \$1.10.

All Colors Mixed—10c. each, 3 for 25c., 7 for 50c., 12 for 90c.

TUBEROUS-ROOTED BEGONIAS.

This charming class of Begonias are, perhaps, the handsomest of all Summer-flowering tuberous plants, and deserve much greater popularity.

Double Colors—Scarlet, Pink, White, Yellow, Rose. 15c. each, 2 for 25c., 5 for 50c., 12 for \$1.15.

Double Mixed Colors. 10c. each, 6 for 50c., 12 for 90c.

Single Colors—White, Yellow, Pink, Scarlet, Rose. 8c. each, 4 for 25c., 8 for 45c., 12 for 65c.

Single Mixed Colors. 6c. each, 5 for 25c., 12 for 50c., 100 for \$3.00.

One each of 10 colors, 5 Double and 5 Single, 65c.

Phrynium.

SUPERB MIXED GLADIOLUS.

Superb Mixed. (First size.) No finer mixture of these grand flowers can be had than our Superb Mixed. Colors, red, snow white, pinks, variegated, blotched, striped, etc., and will furnish you an abundance of bloom early in the summer. **4 for 10c., 12 for 25c., \$1.50 per 100.**

Superb Mixed. (Second size bulbs.) All blooming bulbs, same quality as above but smaller. **5 for 10c., 12 for 15c., 25 for 25c., 100 for \$1.00.**

Hardy Gladiolus Lemoinei. The odd and fantastic markings of these Gladiolus, and their beautiful shape resemble the fascinating beauty of the Orchid. Yellow, crimson, white, brown, green, pink, etc., are blended together, producing an effect seen in no other flower. They are of recent introduction, therefore new and quite unknown. Besides their gay colors and odd markings, they have two very important points. First, they bloom two or three weeks earlier and are in full perfection before others appear, and, secondly, they are hardy. Mixed, 30 colors and kinds. **3 for 10c., 5 for 15c., 12 for 25c., 30 for 50c., 75 for \$1.00.**

Gladiolus Childsi. It is difficult to describe flowers of such varied and peculiar beauty as these Gladiolus. They are much stronger and more vigorous than others, the growth being exceedingly rank and the foliage dark, healthy green. They are very tall and erect, often standing four or five feet high, with spikes of bloom over two feet in length. They branch freely, in most cases each stem producing three or four spikes of bloom, and bloom much earlier than ordinary varieties. The flowers are of great substance and of gigantic size, frequently seven to nine inches across. The form of both flower and spike is perfection itself, and they last in bloom a long time before fading, owing to their great substance and vigor, but the most remarkable feature is their coloring. Orchids cannot surpass them in their varied and delicate shades, markings and blendings. Every color known among Gladiolus is represented, and many never before seen, particularly blues, smoky grays and purple-blacks, all having beautifully mottled and spotted throats, made up of white, crimson, pink, yellow, etc., and in this peculiar network of charming spots and colors lies one of its special points of unsurpassed beauty. The flowers are more beautifully colored than Lemoinei's Hybrids, and much larger than Gandevensis.

Fine Mixed Gladiolus Childsi. All colors and varieties. Every one an exquisite beauty. Large flowering bulbs. **3 for 15c., 6 for 25c., 12 for 40c., 100 for \$3.00.**

CINNAMON VINE.

A very popular hardy climber, flowering in midsummer quantities of white flowers with cinnamon fragrance. **5c. each, 6 for 25c.**

MONTBRETIAS.

Miniature like Gladiolus throwing up a profusion of golden orange bloom all Summer. **5c. each, 3 for 10c., 12 for 30c.**

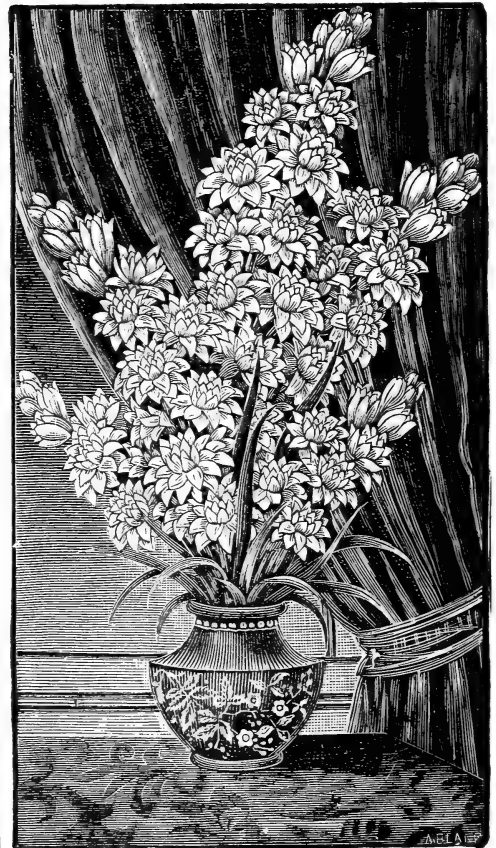

AMARYLLIS

ATAMASCO.

Bloom all Summer, flowers large and very beautiful, color pure white. **5c. each, 3 for 10c., 12 for 30c.**

GIANT SUMMER-FLOWERING HYACINTH.

A new blooming hardy Hyacinth which in August and September throws up quantities of flower spikes two feet tall, which are covered with pure white flowers. Very fragrant. **5c. each, 6 for 25c., 12 for 40c.**

Gladiolus Childsi.

TIGRIDIAS.

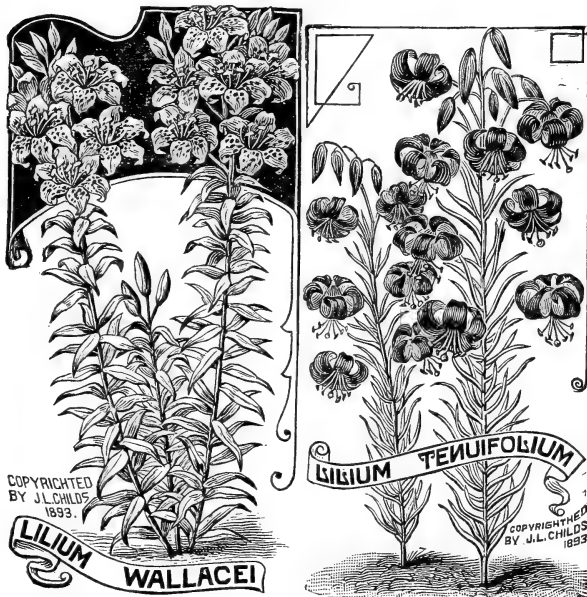

One of the most showy of all summer bulbs, and blooms from midsummer until frost, growing three feet high, with large wide-open triangular blooms four to six inches across. The colors and markings are very brilliant and peculiarly odd and attractive, and clumps of them in the border have a most gorgeous effect. It is difficult to name a flower of such unique and exquisite beauty as a Tigridia, the superb spotting being so self-like and handsome. They are easily grown and always more than satisfactory. **Mixed Sorts, all colors, 10c. each, 3 for 25c., 7 for 50c.**

TUBEROSES.

Double Excelstor Pearl Tuberose. This is the best Double Tuberose in cultivation; grows about eighteen inches high, blooms early and bears immense spikes of large pure white, perfectly double flowers; deliciously sweet. Large blooming bulbs, **3 for 12c., 7 for 25c., 35c. per dozen, \$2.50 per hundred.**

Silver-Leaved Tuberose. A lovely hardy variety; bulbs remain in ground over winter and bloom from year to year; the leaves are bordered with creamy-white, making a handsome ornamental plant. Large single flowers, very sweet; blooms earlier than the other kinds, which adds to its value. Fine blooming bulbs, **5c. each, 3 for 12c., 40c. per doz.**

Orange-Flowered Tuberose. A very beautiful variety with elegant single flowers borne in great profusion; resembles orange blossoms in exquisite beauty and delicious fragrance. It blooms earlier and is considered more hardy than the Excelstor. **5c. each, 3 for 12c., 7 for 25c., 40c. per dozen.**

Tenuifolium. The lovely Coral Lily of Siberia. A great beauty. The brightest of all Lilies. Grows 20 inches high, with finely cut foliage, slender stems and beautifully shaped flowers of a brilliant coral-red. One ought to grow it by the dozen, they are so fine for cutting, and make such grand clumps for the lawn. Blooms very early. **10c., 3 for 25c.**

Wallacei. This Lily is very floriferous, each bulb throwing up from four to six flower stems, each one of which is crowned with three to ten beautiful upright blossoms of a delicate bright apricot color. It is very perfect in form and a most desirable sort. **10c. each, 3 for 25c.**

The Set of 12 Lilies, \$1.00.

HARDY GARDEN LILIES.

Lilium Auratum. (Gold Banded Lily.) Creamy white flowers, spotted with pink and gold, with a golden band down the center. flowers often a foot across. **10c. each, 3 for 25c.**

Longiflorum. White, trumpet formed, very fragrant; a lovely Lily, being almost exactly like the Bermuda Easter Lily, but blooming a little later, and hardy in the open ground, therefore a grand variety for garden culture as well as for pot culture. **10c. each, 3 for 25c.**

Double Tiger Lily. Grows from 4 to 6 feet; foliage a dark green and very long, bearing great quantities of double bright orange-red flowers, spotted with black. **10c. each, 3 for 25c.**

Album. Absolutely pure white, graceful and fragrant. **10c. each, 3 for 25c.**

Elegans Bicolor. Another grand early blooming sort, exceedingly showy, being of a brilliant red color, flamed with yellow; very large and perfect. **10c. each, 3 for 25c.**

Tigrinum Splendens. (IMPROVED TIGER LILY.) Bright orange, thickly spotted black. As hardy as an oak. **10c. each, 3 for 25c.**

Thunbergianum. Early flowering, ranging in height from fourteen inches to four feet; flowers cup-shaped, borne upright, and of a great variety of colors. They are very effective planted either in lines or clumps, and include many showy sorts. Mixed bulbs. **10c. each, 3 for 25c.**

Pardalinum. (Leopard Lily.) Rich scarlet and yellow flowers, spotted with rich brown. Robust and free flowering. A superb Lily and one which will give the greatest possible satisfaction. Succeeds in all situations. No garden complete without it. **10c. each, 3 for 25c.**

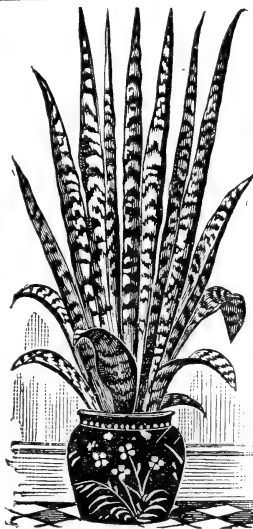

Umbellatum. One of the very best, blooming in June or July, with very large perfect flowers and dazzling colors. They are robust growers and produce an enormous head of bloom. Colors range from black red through all the shades of crimson, rose, yellow, buff, apricot, etc., many being finely spotted and variegated. **10c. each, 3 for 25c.**

Speciosum Rubrum. White, shaded and spotted with deep red and carmine; very sweet. **10c. each, 3 for 2 c.**

NEW EVER-BLOOMING TRITOMA.

Plants show from 6 to 20 flower stalks at a time, each holding at a height of 3 or 4 feet a great cluster of flame-colored flowers of great beauty and brilliancy. Each cluster keeps perfect for weeks, and when it fades two or three more are ready to take its place. Fall frosts do not stop it from blooming, as it is hardy in open ground south of Pennsylvania; further north it should be wintered in cellar. Plants ready to bloom. **20c., 3 for 50c.**

SANSEVIERA ZEALANICA.

Leaves grow to a length of 3 to 4 feet and are beautifully striped and variegated cross-wise with white on a very dark green ground, which makes it a very attractive pot plant. In May and June it sends up long plumed flower spikes, which, together with its sword-like leaves, make it a superb plant. The splendid outlines of this plant, together with its distinctive markings, make it a superb plant for jardinières or center pieces. **15c., 2 for 25c.**

CLERODENDRON BALFOURII

Or Climbing Fuchsia.

This is a slender blooming climbing vine, highly valued for window and house culture; will grow two to three feet high, and can be trained in any form desired. It is a tremendous bloomer, bearing, in Spring, Summer and Winter, hundreds of pretty little pear-shaped flowers for months at a time. The flowers are rich bright crimson inside and creamy white outside, which makes a very striking and attractive combination, always greatly admired, and should be in every collection of window plants. **10c. each, 3 for 25c.**

6 NEW AND RARE SUMMER FLOWERING CALLAS FOR \$1.00.

Green Calla. It is our good fortune to control about the only stock of this rare novelty that is in this country, and we are the only firm offering same for sale this year. As a foliage plant it is without an equal, excelling in many points the **Fancy Leaved Caladiums**; the foliage is veined and variegated in the most artistic fashion. The flowers, which it produces in great quantities, are of a beautiful light green (an entirely new color in Callas), an average from 8 to 12 inches in length, and these contrasted with the foliage make one of the most striking plants ever introduced. It grows as easily as any summer flowering bulb, and, after blooming all Summer in open ground, may be transplanted in the Fall for Winter blooming in the house, and the quantity of flowers a plant will produce is astonishing. **Strong blooming bulbs, 25c. each, 3 for 50c., 7 for \$1.00.**

Red Calla. All that is said of the **green Calla** may be truthfully said of this new and rare Calla; its habit of growth and freedom of bloom is identical with the above. The variegations and markings, instead of appearing on the leaves, appear on the flower stems, which, together with the **Red Flowers** and green foliage, make a combination of colors never before seen in a Calla. **Strong blooming bulbs, 25c. each, 3 for 50c., 7 for \$1.00.**

Calla Fragrance. (White Calla) In this Calla we not only have a charming plant and useful flower produced in a profusion never before equaled in a Calla, but we also have a genuine sweet, lasting fragrance all its own, yet similar to that of **Violets** and **Lilies**, which has never before been obtained in a Calla. The flowers are of purest white and the foliage is entirely unique, being handsomely fluted. **Strong blooming bulbs, 25c. each, 3 for 50c., 7 for \$1.00.**

Yellow Calla. This is one of the rarest and most eagerly sought of all Callas. The color is one of the most beautiful shades of yellow seen in flowers and, with its jet black center, lends to the blossom a peculiar charm. The bulbs are strong and send up a rank growth of beautiful leaves. It requires the same treatment as other Callas and will bloom very soon after planting. **Large blooming bulbs, 30c. each., 3 for 60c., 5 for \$1.00.**

Dwarf Ever-Blooming Calla, Little Gem. This is a novelty of great merit, which we can highly recommend, having given it a fair trial with the ordinary variety known as the Calla Lily. The only objection to the old variety is that it sometimes grows tall and scraggly, but the "Little Gem" is of strong and dwarf habit, rarely growing over 12 inches tall. The foliage is of a lustrous dark green and is produced in great abundance. Its flowers are produced in the greatest profusion, being literally an ever-bloomer; it will bloom freely all Summer out in the open ground; in September it can be lifted and potted, and will continue blooming all Winter. The "Little Gem" Calla will continue to grow and bloom for years without ceasing, and the quantity of flowers which a large plant will produce is astonishing. **Large bulbs, sure to bloom, 15c., 4 for 50c., 9 for \$1.00.**

Spotted Leaved Calla. The leaves of this beautiful Calla are deep green, with numerous white spots, which give the plants a magnificent appearance. The flowers are pure white, with a black center, and very beautiful. They grow freely in any soil either indoors or out. They flower splendidly in the garden treated like **Gladiolus**; they should be taken up in the Fall and kept in dry sand during the Winter. The bulbs we send out are large and solid, and will all flower freely soon after planted. **Extra large bulbs, 10c. each, 4 for 30c., 12 for 75c.**

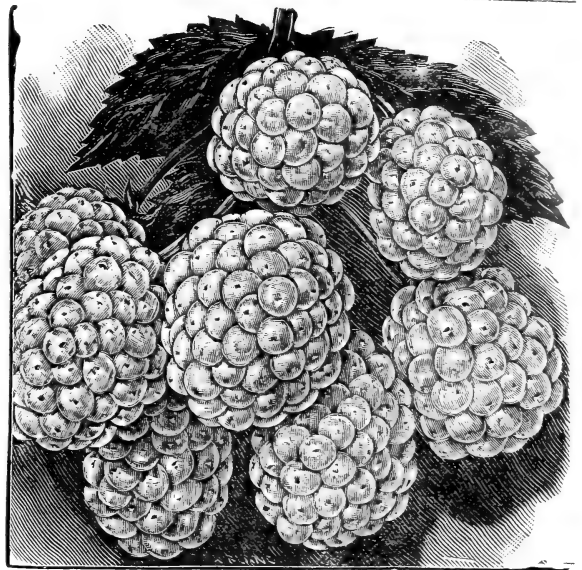

SPECIAL OFFER.—One each of the above named Callas, 6 in all, for \$1.00.

NEW TREE STRAWBERRY.

This is one of the most beautiful fruits ever seen; berries the size and shape of the largest strawberries; bright, rich, shining scarlet, with an exquisite bloom; makes lovely jams, jellies and tarts; having a delicious flavor entirely different from any other fruit; bears the first season and gets larger and stronger every year. It came from Japan, and was tested for two years here. The bush grows from 18 inches to 2 feet high, is entirely hardy and will do well everywhere, regardless of heat and drought. All lovers of new fruits should give it a trial. **Strong Plants, fruit first year, 10c., 7 for 50c., 12 for 75c.**

Tree Strawberry Seed germinates very quickly and soon produces fine plants which will fruit the second year. **Per Pkt. 5c.**

NEW WHITE BLACKBERRY ICEBERG.

Another season's experience with it has only the more thoroughly confirmed our good opinion of the Iceberg Blackberry. No one should judge of it from the unsatisfactory qualities of the White Blackberries heretofore known, for they have been of interest as curiosities only. In the Iceberg we have a berry above the average of other kinds in size and flavor, equalled by only a very few in hardness and productiveness, and absolutely unequalled by any in handsome and attractive appearance. We especially recommend the Iceberg as a dessert fruit. What could be more enticing and appetizing, as well as delicious, than a dish of these transparent, crystal-like berries, suffused with yellow cream? No blackening of the teeth and lips in eating this snowy fruit. The Iceberg is one of the very earliest varieties,

ripening its first fruit in the latitude of Western New York as early as July 6th to 8th, being more than a week ahead of Taylor. The fruit is of good size, usually not less than 1 inch in length when fully developed, hrs being rather above the average of other varieties in this respect. Like other Blackberries, the Iceberg has a slightly bitter flavor if not thoroughly ripened, but when fully ripe the flavor is sweet and pleasant. There is no hard core to the berries, as in many other sorts; in fact, no core is perceived in eating them—all is sweet and delicious. In this point the Iceberg is unsurpassed by any other variety with which we are familiar. The berries are borne in splendid large clusters, and so freely that the canes are often bent over nearly to the ground. **Strong Plants, 10c. each, 3 for 25c., 7 for 50c., 12 for 75c., \$5.00 per 100.**

JAPANESE WINEBERRY.

This is the most remarkable fruit ever introduced. It belongs to the Raspberry family and grows about five feet high, and is perfectly hardy. The fruit is borne in large clusters, from 75 to 100 berries in a bunch, and until they are ripe they are inclosed in **burs**. When ripe the burr opens and exhibits a large bright scarlet berry of the most delightful flavor and extremely juicy. **Price 10c., 4 for 25c., 9 for 50c., 12 for 65c.**

EVER-BEARING STRAWBERRY SAINT JOSEPH.

This is really the first true ever-bearing large fruited Strawberry ever offered. We quote the introducers of this grand fruit as follows: "During last season we had it at our grounds, and a bounteous crop of splendid fruit has been gathered on these plants up to October." And we—on our own grounds, at Floral Park—gathered fruit as late as November 1st. The flower stems are produced in succession from May to October; and as they have an abundance of fruit, some support for them is almost necessary. The fruit is of good size, dark red in color, solid, firm, very juicy, and of elegant quality. Early runners, planted separate during Summer, have also produced a very good crop the same Autumn. The Department of Agriculture writes that it is the only true **ever-bearing** variety of merit yet introduced. It also obtained a first-class certificate from the Société Nationale d'Horticulture de France. **Strong Plants, fruit first year, 8c. each, 4 for 25c., 8 for 50c., 20 for \$1.00, \$4.00 per 100.**

Giant Peony Flowered Perfection Aster.

ASTERS.

It is unnecessary to dwell on the great beauty of these popular favorites, as they are loved by everyone. We recommend our friends to plant a number of varieties, as no other annual affords so grand a display of flowers.

TALL-GROWING ASTERS.

(Height from eighteen inches to two feet.)

Truffant's Peony Flowered Perfection. Among the most popular of all Asters. Very double, large and beautiful flowers with incurved petals.

Perfection, Snow White, Spotless.....	Pkt. 5c.
Perfection, Blue.....	5c.
Perfection, Red.....	5c.
Perfection, MIXED, Thirty Colors.....	5c.

New Japanese Giant Aster. Flowers immense size, measuring from five to six inches in diameter, with long petals curiously waved and curled so as to give them a striking resemblance to Japanese Chrysanthemums. So far only two colors have been obtained—lovely pink and delicate flesh. **Two Colors, Mixed, Pkt. 5c.**

New Yellow Aster. The first real Yellow Aster ever raised. Stems are long and flowers are bright sulphur yellow. **Pkt. 5c.**

Hardy Aster. Single flowers; will thrive in any good garden soil, and if sown early will bloom first year. They require no protection in winter and will increase in size and beauty each year. **Mixed Colors, Pkt. 5c.,**

Tall Asters, Mixed Colors. Pkt. 4c., ½ oz. 20c., ¼ oz. 35c.

DWARF GROWING ASTERS.

(Height from Ten to Fourteen Inches.)

Dwarf Queen. Large flowering; plants grow from ten to twelve inches and branches are upright (not loose) in habit, making a dense, compact bush; excellent for pot culture as for bedding.

Dwarf Queen, white. **Pkt. 5c.** Dwarf Queen, light blue. **Pkt. 5c.**
Dwarf Queen, crimson " **5c.** Dwarf Queen, dark blue. " **5c.**
Dwarf Queen, Finest Mixed, **Pkt. 4c.**

Dwarf Chrysanthemum Fld. Aster. Very compact growth; flowers three to four inches across and resemble Chrysanthemums. **Mixed Colors, Pkt. 4c.**

Fuller's Little Gem. Grows about six inches tall and is covered with the most charming pink and white flowers. **Pkt. 5c.**

Fire Ball. The most brilliant scarlet flowers; bush growth ten inches high. **Pkt. 5c.**

Dwarf Asters. All Colors, Mixed. Pkt. 4c., ½ oz. 25c., ¼ oz. 45c.

Semple's Late-Flowering Aster.

NEW VARIETIES OF ASTERS.

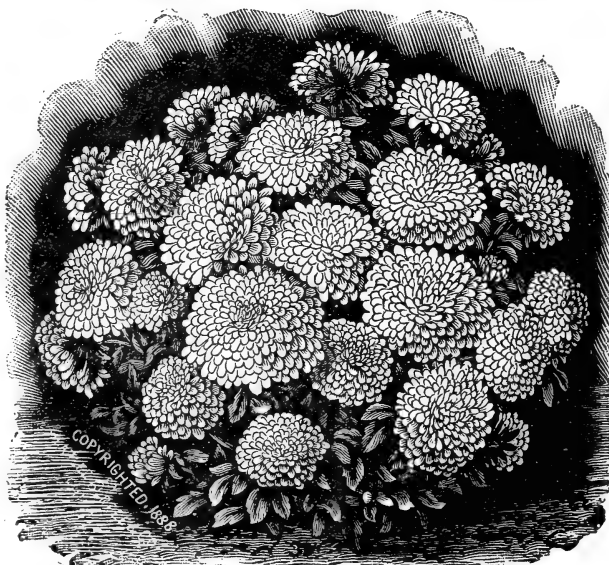

New White Branching Giant Flowered. Flowers are pure white and very double; borne on long stems, making them excellent for cut flowers. The long petals are twisted and curled most gracefully. **Pkt. 5c.**

Crown Aster. A very striking and unique variety. Center pure white, surrounded with dark colors. **Pkt. 5c.**

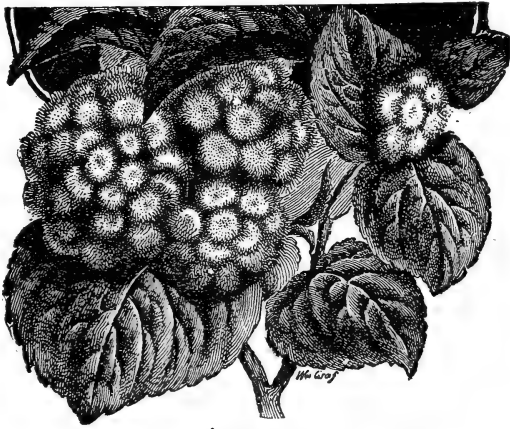

Semple's Late-Flowering Asters. Superior to any other class of late-flowering branching Asters, lengthening the Aster season until frost. The flowers are large, about four inches across, and very double, and begin blooming in September. Colors—Pink, White, Red. **Pkt. 5c.; the 3 Colors, 12c.**

Victoria Aster. Very popular with lovers of cut flowers, as flowers which are four inches across are borne on very long stems. **Mixed Colors. Pkt. 5c.**

Asters, All Colors, Mixed. Our mixture is made up of tall, dwarf and all the new and choice named kinds, and can not be equalled for variety of colors. **Pkt. 3c., 2 for 5c., ½ oz. 15c., ¼ oz., 25c.**

Large Flowering Dwarf Queen Aster.

Ageratum.

AGERATUM.

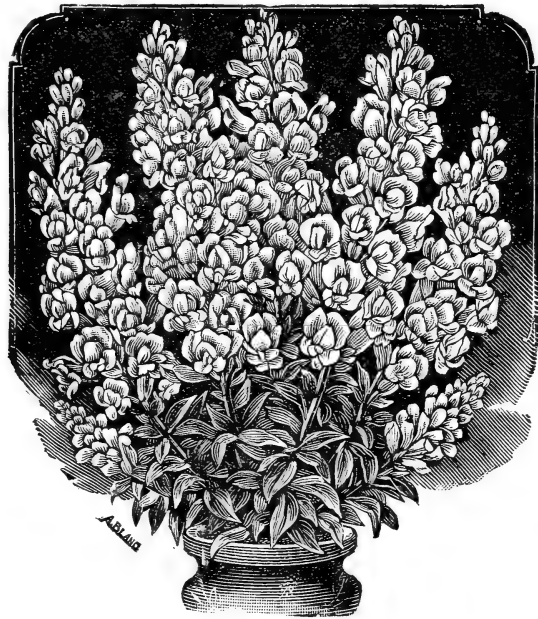

One of the most constant bloomers known, flowers lasting from six weeks to three months. The dwarf varieties are very suitable for edging.

Little Gem. Very dwarf flowers of lovely blue, an elegant border variety. **Pkt. 3c.**

New White. Flowers pure white. The very best of its color. **Pkt. 4c.**

Golden Gem. Pure golden yellow: double. **Pkt. 3c.**

Ageratum, mixed, all colors, Pkt. 3c.

Alyssum—Little Gem.

ALYSSUM.

The Sweet Alyssum is one of the most fragrant and useful of all annuals, and blooms very quickly from seed.

Little Gem. One of the finest plants for edgings, as it is exceedingly dwarf, not growing over 6 inches high, and covered all season with pure white flowers. **Pkt. 3c., 1/4 oz. 10c.**

Yellow (New). Perfectly hardy and will bloom first year, and will increase from year to year. **Pkt. 5c.**

Sweet Alyssum. The old-fashioned pure white. **Pkt. 3c.; 1/4 oz. 10c.**

Alyssum, mixed, all colors, Pkt. 3c.; 1/4 oz. 8c.

ANTIRRHINUM. SNAP DRAGON.

One of the most constant bloomers of all the hardy perennials flowering very freely the first year from seed. The flowers are produced on long spikes, and are very popular in cut flower market.

Queen of North. Pure white and very double. One of the best for cut flowers. **Pkt. 5c.**

Golden Yellow. Pure yellow; very sweet. **Pkt. 5c.**

Coccinea. Very bright scarlet. **Pkt. 5c.**

Tom Thumb. Grows only 6 inches high, and makes a grand edging plant. Mixed colors. **Pkt. 4c.**

Tall Mixed. A mixture of tall growing varieties, including all colors. **Pkt. 4c.**

One each of the five Antirrhinums. **15c.**

Bellis.

Brachycome.

ABUTILON OR FLOWERING MAPLE.

As indispensable for the window or greenhouse as the Petunia is for the flower garden. Will stand more abuse and neglect than almost any other plant. Grows rapidly from seed and is soon in bloom. Leaves are very ornamental. **Pkt. 10c.**

BELLIS (Double Daisy). Beautiful double flowers that are great favorites, bloom in early summer.

Longfellow. Double, dark crimson. **Pkt. 4c.**

Double, Pure White. The very finest for bloom. **Pkt. 4c.**

Double, Mixed, All Colors. Choice strain. **Pkt. 3c.**

BRACHYCOME (Swan River Daisy). A very dwarf and bushy plant that is covered all Summer with a profusion of blue and white flowers that quite resemble Cinerarias, fine pot or basket plant. **Pkt. 4c.**

CACTUS. These curious and hardy plants grow very easy from seed, and our mixture contains some rare varieties. **Pkt. 10c.**

Balsam Camellia-Flowered Double.

BALSAMS.

For years we have been headquarters for a very choice strain of home-grown Balsam Seed, unsurpassed by any other, and as they are among the most beautiful of all garden annuals, and the easiest grown (it is not an uncommon sight to see hundreds of double flowers on a single plant), our friends cannot plant too many of them.

Snowball (or Camellia Flowered). Large double, pure white. **Pkt. 5c.**

Royal Purple. The nearest approach to deep blue. **Pkt. 5c.**

Crimson. Intensely brilliant. **Pkt. 4c.**

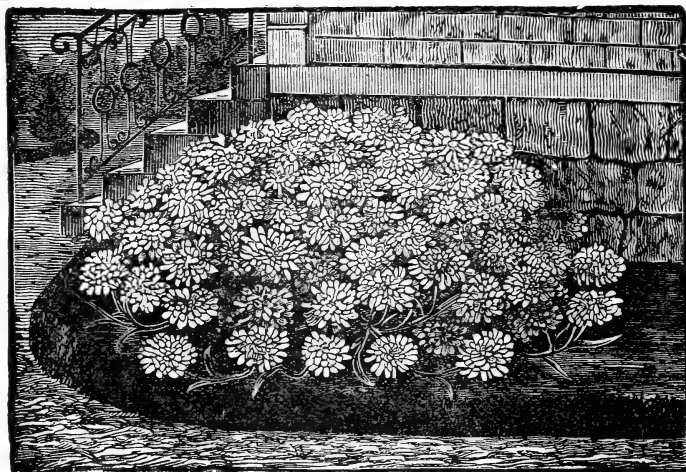

Maiden's Blush. Pure delicate pink. **Pkt. 4c.**

Scarlet, White Spotted. Very large flowers. **Pkt. 5c.**

Double Superb Mixed. Composed in nearly equal proportions of all the above named. **Pkt. 4c.; ¼ oz. 10c.; oz. 30c.**

Lemon. The very nearest approach to yellow yet introduced, and should be included in every collection. **Pkt. 5c.**

The six named Balsams 20c.

CANDYTUFT.

Candytufts have long been among the most popular of all garden annuals, and the best effect is produced by raising the plant in masses; the soil should be rich, and when blooming time comes keep the plants well watered.

Snow Queen. Pure white. Blooms in May. **Pkt. 4c.**

Rocket, White. Flowers borne on spikes. **Pkt. 4c.**

Empress. This new pure white Candytuft forms a dense, bushy plant of a spreading habit, and bears its snowy flowers in endless profusion. It is sure to delight all. **Pkt. 4c.**

Hardy Candytuft. Perfectly hardy, and will bloom from year to year; plants a mass of white flowers; it is really a floral treat. **Pkt. 5c.**

Centaurea.

DIANTHUS.

The Dianthus, which is closely allied to the Carnation and Picotee, has long been a great favorite. They live out over Winter.

Mourning Cloak. A rich variety of most unique coloring. Large double flowers of a velvety purplish black, each petal tipped and fringed with snowy white. **Pkt. 4c.**

The Bride. The groundwork of the flower is a clear, pure white, with a radiant, glowing, crimson center, shading into a pink band next to the white border. **Pkt. 4c.**

Snowball. Very large double white flowers. **Pkt. 4c.**

Dianthus Mixed. All colors, very fine. **Pkt. 3c.**

NEW GIANT FRAGRANT CENTAUREA IMPERIALIS.

This new Centaurea, a cross between C. Moschata and Margaret, represents the best that has been produced in these beautiful Summer-blooming plants. The bushes are about four feet high, of enormous dimensions and are covered with large, beautiful flowers of the form and fragrance of Centaurea Margaret. The flowers will keep for over a week in water, if cut just when they are about to open. It is of easiest culture. The color variation is very great, almost infinite. When well known there will be no garden without this beautiful new flower. If a package of seed is sown every two or three weeks until July a constant succession of bloom can be had throughout the whole Summer and Fall.

Centaurea Imperialis, Giant White, very fragrant. **Pkt. 5c.** **Centaurea Imperialis,** Giant Lilac, White Center. **Pkt. 5c.**
Centaurea Imperialis, Giant Pink, White center. **Pkt. 5c.** **Centaurea Imperialis,** Giant Rosy Red. **Pkt. 5c.**
Centaurea Imperialis, Brilliant Purple. **Pkt. 5c.** **Centaurea Marguerite,** very fragrant, pure white. **Pkt. 5c.**
Centaurea Imperialis, Mixed, all colors. **Pkt. 5c.**

One Package Each of above Six Centaureas, 20c.

EARLY FLOWERING COSMOS.

Cosmos Klondike.

The Cosmos has a beauty distinct from that of any other plant; its feathery foliage and the soft but brilliant coloring of its bloom make it a universal favorite; but the common varieties are so late that they hardly have time to come into bloom before frost. We have secured an early flowering strain which will produce plants that will come into bloom the last of July, and are covered with flowers until late Fall.

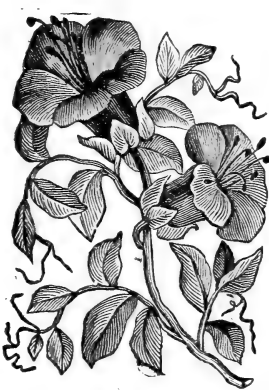

Dawn, New Early Dwarf, Large Flowering. A new variety; more bushy and compact than the older varieties and grows only about four feet while all others attain a height of six to seven feet. The flowers are fully as large as those of the old sort, are a pure white with a tinge of rose, the petals are rather broader, which causes the flowers to appear more round. They commence to bloom in July and last until frost. **Pkt. 5c**

"Klondike." A golden-yellow Cosmos that has the size of flower of the well-known white and pink sorts. The flowers are borne on long stems and measure from $2\frac{1}{2}$ to $3\frac{1}{2}$ inches across. In form they resemble the ordinary Cosmos, but in color we know of nothing that compares in richness and depth of the golden hue. To get this variety in bloom before frost in the States north of Virginia it should be grown in pots or boxes, so that the roots are confined, thus throwing it into flower, and as a Fall and Winter bloomer for the house it is simply grand, remaining in flower until Easter. **Pkt. 5c.**

Pink. Beautiful delicate pink. A most delightful flower. **Pkt. 4c.**

Black. Bushy grower, and plants covered with flowers of almost velvety blackness with golden yellow anthers. **Pkt. 5c.**

Early Flowering, Mixed. We offer a new giant strain of wonderful beauty and size. The individual flowers measure from four to five inches, borne on long, graceful stems; the colors are pink, crimson, white striped, black, etc. Some are star-shaped, others fringed. All colors, mixed. **Pkt. 5c., 3 for 12c.**

COBEA SCANDENS

The finest of all climbers; beautiful bell-shaped flowers, from one and a half to two inches across, that open a clear green and turn to a purple blue. Plants grow fifty feet in a season and begin flowering when quite young. Remove to house for Winter blooming. **Pkt. 4c., 3 for 10c.**

DATURA CORNUCOPIA.

Very much like the double Brugmansia except much more dwarf in habit and a beautiful lilac and white color spotted. A very showy and delightful pot plant; blooms very quickly from seed. The roots can be preserved over Winter in cellar, like dahlia roots. **Pkt. 5c.**

CARNATIONS FROM SEED.

Carnations are general favorites for their delicious fragrance and richness of colors, and are almost indispensable, both for house culture in Winter and garden in Summer, and can be had very quickly and easily from seed.

Ever-blooming or Chabaud Carnation. A new strain raised by M. Chabaud, a Carnation specialist of Southern France. The plants are of even height, as if trimmed, healthy and vigorous, the stalks as stiff as wire, the flowers large, very double, deliciously sweet and in the largest and most charming color variations. These also bloom in four months from the time the seedlings are up. **Pkt. 10c., 3 for 25c.**

Marguerite Carnation. In flower a few weeks after planting, and produces an abundance of large, double, fragrant flowers. Mixed, all colors. **Pkt. 5c.**

Double Mixed Carnation. All the new and choice varieties. **Pkt. 5c.**

BEGONIA.

We offer the very finest strains of Tuberous Rooted Seed, which will produce beautiful and very often rare specimen Plants.

Single Mixed. Pkt. 10c.
Double Mixed. Pkt. 15c.

CYCLAMEN.

One of the very best plants for pot culture. Flowers are beautiful and the foliage very attractive. Bulbs will live from year to year. **Pkt. 10c.**

DAHLIAS FROM SEED.

Few are aware that Dahlia plants from seeds sown in the Spring will bloom beautifully the first Summer.

Zimpani. A dwarf, low-growing variety, producing a great profusion of black flowers. **Pkt. 3c.**

Double Large Flowering, Mixed. Extra choice, from select seed only. **Pkt. 5c.**

New Single, Mixed Colors. The flowers are large, perfectly star shaped, formed of broad petals, which are gay and beautiful in color. **Pkt. 3c.**

EUPHORBIA (Painted Lady).

Heterophylla.

Plants grow from 3 to 4 feet, and about midsummer become a mass of rich foliage and color. Small white flowers are in the centre of each orange scarlet bract. The leaves become a vivid carmine or red, with green tips. The plant is commonly known as "Painted Lady." **Pkt. 5c.**

MIMULUS.

In exquisite coloring these flowers rival the Gloxinia. The flowers are spotted and marked in a very beautiful way.

Mixed Sorts. (Monkey Flower.) **Pkt. 3c.**

Moschatus. (Musk Plant.) Delightful musk odor from the foliage. Flowers bright yellow. **Pkt. 4c.**

Tigrinus Grandiflorus. Flowers are large, nearly the size of a Petunia and of the brightest and most striking colors, spotted and variegated in a most beautiful manner. **Pkt. 5c.**

SCABIOSA.

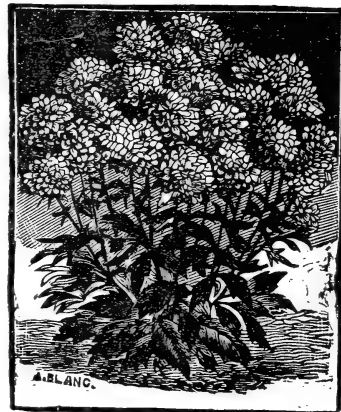

Hardy Annual.

Morning Bride, or Sweet Scabiosa. A beautiful border plant. Mixed colors. **Pkt. 3c.**

Double Mixed Colors. Dwarf habit. **Pkt. 3c.**

Snow Ball. The plant is a strong grower, and the flowers are very large, perfectly double, and as white as snow. **Pkt. 3c.**

Golden Dwarf. Golden. Foliage, very showy as a foliage plant, as well as the flower. **Pkt. 3c.**

Scabiosa.

COLEUS.

The handsomest foliage plant obtained from seed. These Coleus are quite different from those commonly used in beds and borders. The plants reach a height of from 2 to 3 feet; the leaves often measure 10 inches in length and 8 inches in width, heart-shaped, their color combinations are remarkably rich. **Pkt. 10.**

CINERARIAS.

A very beautiful pot or house plant of very easy growth. Colors range from the darkest red to pure white.

Dwarf Blue. **Pkt. 10c.**

Dwarf White. **Pkt. 10c.**

Double Mixed. **Pkt. 10c.**

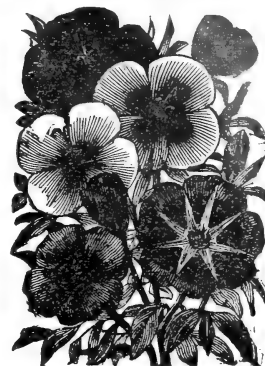

Larkspur.

Gloxinia.

Gourds.

Godetia.

Lavender.

A Page of WELL-KNOWN SEEDS

Centranthus. Almost transparent foliage, flowers are white, pink and rose. **Pkt. 4c.**

Campanula (Canterbury Bells). Very double bell-shaped flowers, very desirable for outdoor planting, being hardy; mixed colors. **Pkt. 4c.**

Canary Bird Flower. A dainty vine with clear yellow flowers and finely cut foliage. **Pkt. 4c.**

Calliopsis. One of the most striking of all annuals, in bloom from May until October. **Golden yellow, Pkt. 3c. Mixed colors, Pkt. 3c.**

Calceolaria. For house this is superb. Plants are one mass of bloom all the year round. **Mixed colors. Pkt. 10c.**

Celosia (Cockscomb). The queen of all outdoor annuals, and should be in every garden. **Glasgow Prize, bright red. Pkt. 3c. New Variegated, red and yellow. Pkt. 3c.**

Delphinium. One of the best hardy plants, increases in beauty from year to year. **Pkt. 3c.**

Foxglove. One of our old favorites and the best tall growing plant for backgrounds. **Pkt. 3c.**

Gloxinia. The most beautiful of all pot plants, large erect flowers of the most satiny kind. **Mixed colors. Pkt. 10c.**

Godetia. Very good for growing in shady places and sure to bloom. **Satin Rose, rich velvety pink. Pkt. 3c. Mixed colors, a mass of brilliant colors. Pkt. 3c.**

Gypsophila Paniculata. A lovely plant with delicate misty flowers in loose panicles, elegant for decorations. **Pkt. 4c.**

Gilia. Will bloom in any situation and is fine for budding. **Mixed colors. Pkt. 3c.**

Gourds (Japanese Nest Egg). Shape like an egg, will remain perfect a long time. **Pkt. 3c. Mixed, all colors, shapes and kinds. Pkt. 3c.**

Helichrysum (Everlasting Flower). One of the most beautiful of all everlasting flowers, grows about two feet and blooms very late in Fall. **Mixed colors. Pkt. 4c.**

Ionopsidium (Diamond Flower). A most charming little flower for pot culture; seed blooms in 30 days. **Pkt. 4c.**

Larkspur. Sow early in open ground and you will have a mass of blooms all Summer. **Mixed colors. Pkt. 3c.**

Lavender. Every house and every garden should have this grand plant, very useful in many ways. **Pkt. 4c.**

Lantana. A great border and bedding plant, large verbenalike flowers of rich orange, pink and yellow. **Mixed colors. Pkt. 4c.**

Lobelia. Charming for beds or baskets and one of the best Winter pot plants. Colors very bright, will bloom in a month. **Mixed colors. Pkt. 4c.**

Nigelia (Love in a mist). Very valuable for bouquets, the double flowers are surrounded by a mist-like veiling of finely cut foliage. **Pkt. 4c.**

Sunflower. Makes a very striking flower in the garden. (New Double Dwarf.) **Pkt. 3c.**

Thunbergia (Black Eyed Susan). Extremely hardy and easy to grow and always in bloom, fine for borders. **Pkt. 4c.**

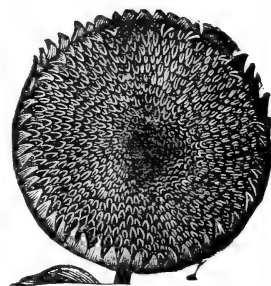

Whitlavia. Grows somewhat like a foxglove, only more trumpet-shaped; color, deep blue, light throat. **Pkt. 4c.**

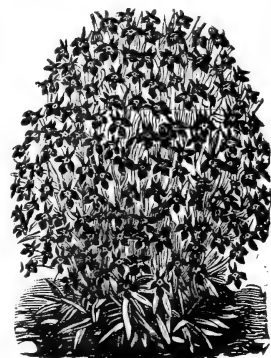

Foxglove.

Gilia.

Sunflower.

Lobelia.

Celosia.

Lantana.

Gypsophila

GIANT HELIOTROPE.

These beautiful new Heliotropes, **Lemoine's Hybrids**, are among the finest novelties of the year. They are as easily grown as the older kinds, and far surpass them in size, beauty and sweetness; the plants grow about two feet high and bear enormous clusters of exquisitely fragrant flowers. Colors range from pure white, through all shades, to dark indigo blue.

Lemoine's Hybrids, Mixed. Pkt. 8c.
Heliotrope Finest, Mixed. Pkt. 5c.

CALENDULA.

The name of this flower is derived from the fact that it will bloom every calendar month of the year. If seed is sown early in open ground, plants will be in bloom by June, and will bloom continuously.

Calendula, Oriole. Extra large, double and brilliant yellow. **Pkt. 3c.**

Calendula, Pot Marigold. Large and double; rich golden yellow flowers. **Pkt. 3c.**

Mixed. All the fine double sorts. **Pkt. 3c.**

GERANIUMS FROM SEED.

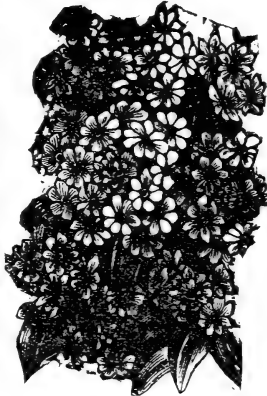

This grand plant is the stand-by for all—and at all times—for bedding in Summer and for pot culture in Winter. Few know how quickly and easily they grow and bloom from seed. Some of the finest sorts are gotten this way. Start seed early and you will have lots of bloom the first year. **Single and Double Mixed. Pkt. 5c.**

Scarlet Mixed. All red varieties. **Pkt. 5c.**

Pansy Geranium. This new and beautiful Geranium is of easiest growth, dwarf in habit, and literally covered with flowers all the time, and as it requires little or no attention it is invaluable as a window plant. The coloring and marking of the flowers are most extraordinary—light pink, white, dark purple and black, etc., almost rivaling the pansy in uniqueness of flower. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. **Pkt. 15c.**

PLANTS, PANSY GERANIUMS.

We have one of the most complete stocks of plants of this great favorite that can be found in this country, and those who prefer plants to seed we are sure will be delighted with our stock. Price, strong plants, 20c. each, 3 for 50c.

MYOSOTIS.

(Forget-Me-Not.)

These charming little favorites succeed best in damp, sandy places, but will thrive well in almost any soil. Elegant for pot culture in shady windows, where few plants will grow.

Pure White. Very fine. **Pkt. 4c.**

Blue. Charming. **Pkt. 3c.**

Dwarf. Mixed colors, bushy. **Pkt. 3c.**

Calendula.

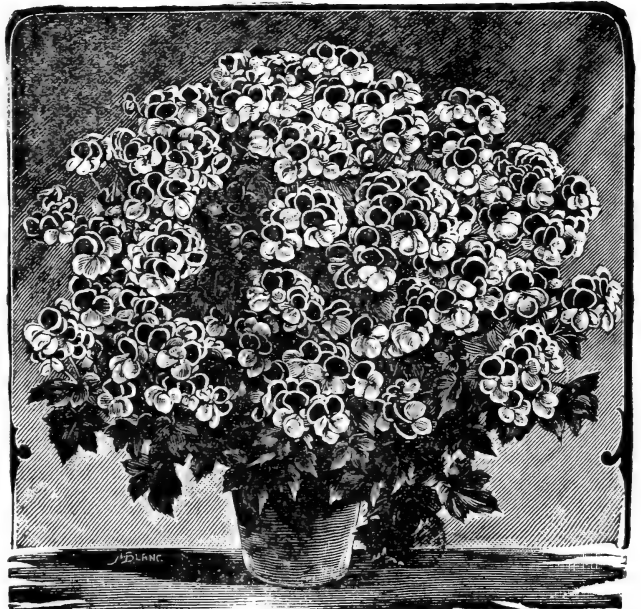

JAPANESE CHRYSANTHEMUMS.

Hardy with protection. Composed of all the very best Japanese and Chinese sorts, imported direct from Japan. Beautiful colors, curved and twisted in a manner never before seen. Start seed early in the house and plant to open ground when weather is favorable.

Tokio. Curious shapes and beautiful colors, including the famous ostrich plumed sorts. **Pkt. 7c.**

Maximum Perfection. New variety, of great beauty. Elegant for cut flowers, as stems are very long. Plant about eighteen inches apart, and give a little protection first Winter. **Pkt. 5c.**

Pansy Geranium

NEW HARDY HIBISCUS.

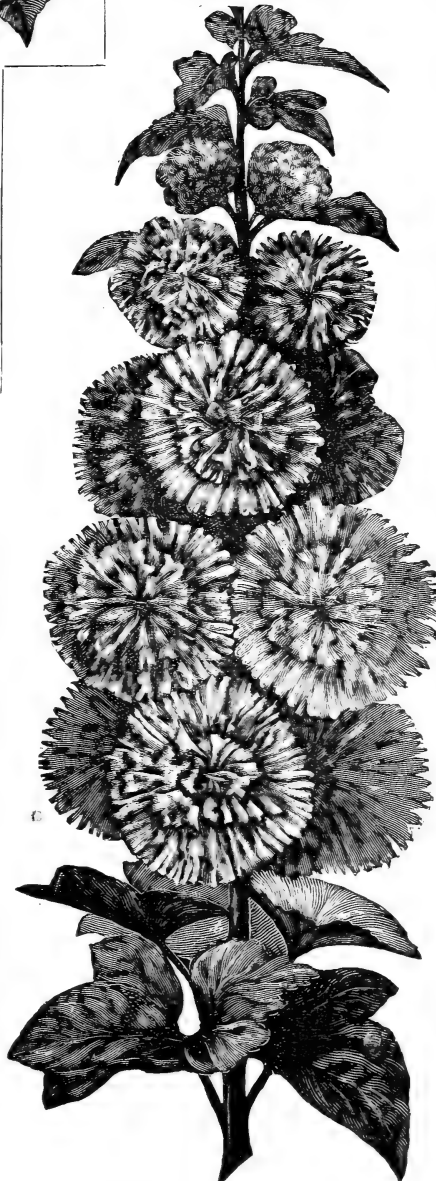

One of the fastest growing hardy perennials we have and the most profuse bloomer, a plant often having 300 blooms on. Just the thing for hedges, as they never winter-kill, and are in bloom in midsummer when other flowers are very scarce. Blooms from seed the first year in open ground. Mixed colors. **Pkt. 5c.**

Crimson Eye. Flowers immense size, five inches across. Pure white, with deep crimson center. Hardy. **Pkt. 5c.**

HOLLYHOCK ALLEGHENY.

This grand new race of Hollyhocks is a most decided improvement in all respects over the older varieties. Indeed, so different are they, and so much more beautiful in texture and appearance, that one would hardly suspect they were related to the rather ordinary-looking old-style Hollyhocks. While the flowers of the common Hollyhocks rarely exceed three inches across, with this new race they are seldom less than five inches, most of them being over five inches and often seven inches across. The leading idea and aim in the breeding of the Allegheny Hollyhocks was to produce a race of perpetual blooming habit, and this has been attained with a success that is most gratifying. Two to four buds are formed at the base of every leaf, where the old-style Hollyhocks have but one. These buds develop in rotation, the largest first and then the smaller ones, until all have opened into beautiful flowers. In any mild climate new buds are formed before the first crop has finished flowering, so that in the South flowers are produced all the year round, and in the North from July until cut off by frost. No one can imagine the beauty and brilliancy of the blossoms without seeing them. A row of plants in full bloom has as beautiful and varied shades of coloring as the rainbow.

Double White, Pkt. 5c.
Double Yellow, Pkt. 5c.
Double Red, Pkt. 5c.
Double Pink, Pkt. 5c.
Double Mixed, all colors, Pkt. 5c.

Allegheny Hollyhocks.

SMILAX.

One of the most desirable window vines by reason of its elegant and graceful foliage, and grows several feet first season. **Pkt. 5c.**

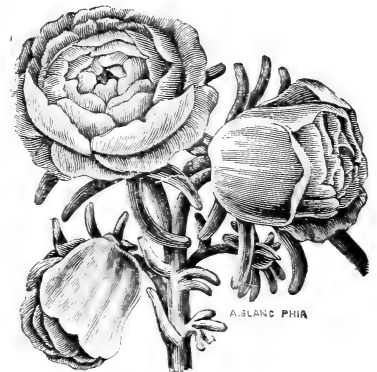

GAILLARDIA LORENZIANA.

A new **double** Gaillardia of the most popular and fashionable style. Long stems, good for vases or bouquets, or for wearing; blooms continually all Summer. Scarlet, yellow, claret, beautifully bordered. **Pkt., 20 colors, 4c.**

Gaillardia Single. Very showy, large single flowers like a peacock feather, always in bloom during Summer; mixed colors. **Pkt. 3c.**

Hardy Gaillardias. Aurora Borealis, as gaudy as a flower can be; bloom first year from seed and live from year to year. Flowers bring high prices in market; finest mixed varieties. **Pkt. 5c.**

PORTULACA.

In brilliancy and beauty of colors, Portulacas are unrivaled; they delight in sunny situations, where they very soon carpet the ground. Some double as roses.

Grandiflora, Mixed Colors. White, crimson, rose, scarlet, yellow, striped, etc. Very brilliant. **Pkt. 4c.**

Double Rose-Flowered, Mixed Colors. Large blossoms, as double as Roses, and of the greatest variety of colors and variegations. Our seed is extra choice and will produce large double flowers. **Pkt. 5c.**

Double Yellow. Fine brilliant color. **Pkt. 5c.**

Double Scarlet. Clear and bright. **Pkt. 5c.**

Double White. Pure and beautiful. **Pkt. 5c.**

NEW NASTURTIUM CHAMELEON.

This new strain of Nasturtiums is a most remarkable advance in this brilliant family. We find that in richness and variety of colors it surpasses any other strain, and is also unique in bearing flowers of quite distinct colorings on one and the same plant, some clear, deep crimson, others blotched on light ground and others beautifully mottled. This characteristic as well as the wonderful richness of the unusual markings has been fixed in both the tall and dwarf forms, and we recommend both strains to every grower.

Tall Chameleon. This variety, with its very large, rich flowers in the greatest variety, is unsurpassed for training over fences and trellises, and blooms with the greatest freedom the entire season. **Pkt. 5c., oz. 25c.**

Dwarf Chameleon. This strain is remarkably dwarf and as a border or bedding plant has a distinct place. Its flowers are even more intense in color, are carried well above the foliage and sometimes almost hide it. The variation of color of course adds greatly to its interest. This is the most brilliant mixture of Nasturtiums we have ever seen; the colors and color combinations are simply magnificent. **Pkt. 5c., oz. 25c.**

New Climbing Nasturtium, Princess Victoria Louise. This is surely one of the most beautiful and remarkable varieties of climbing Nasturtiums. The large and nobly shaped flowers are cream-white with orange-scarlet blotches, the calyx and the spur being of a pure orange-red, which is a rather rare color among the annual Nasturtiums; sometimes the flowers are edged with red. The foliage is of a fine dark green color. **Pkt. 10c., oz. 35c.**

Madame Gunther's Hybrids. For richness and variety of colors these new hybrids have no equals among Nasturtiums. There are shades of rose, salmon, brightest red, pale yellow, either as self colors or spotted and striped. The foliage is mostly dark and contrasts very effectively with the rich colors. They are climbers and are free and continuous bloomers. **Pkt. 5c., oz. 15c.**

Tall Nasturtiums, Mixed. Twenty kinds and colors. **Pkt. 3c., oz. 10c., ¼ lb. 25c., ½ lb., 40c., 1 lb. 75c.**

Dwarf Lady Bird. Very fine, bright yellow, marked with stripes and blotches of ruby crimson. **Pkt. 3c., oz. 10c.**

Dwarf Empress of India. Very dwarf and compact in habit, the leaves being of a dark purplish color, while the flowers are of a deep brilliant crimson. Grand things for edging or massing. **Pkt. 3c., oz. 10c.**

Dwarf Mixed. The very finest mixture of all the low-growing varieties. **Pkt. 3c., oz. 10c., ¼ lb. 25c., 1 lb. 80c.**

LOBB'S NASTURTIUM.

They are as easily grown as the common Tall Nasturtium, which they far surpass in brilliancy of their flowers, in height, rapid growth and freedom of bloom. Also very desirable for Winter blooming. **Pkt. 5c., oz. 10c., ¼ lb. 30c., 1 lb. \$1.**

Chameleon Nasturtium.

Nasturtium Princess Victoria Louise.

NICOTIANA SYLVESTRIS.

A New Ornamental Tobacco Plant.

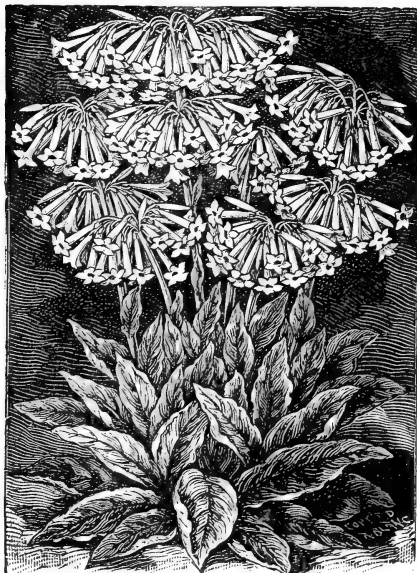

This is one of the handiest of ornamental plants. It grows from four to six feet high, is of beautiful pyramidal form. The foliage is large and handsome. The flowers are pure white, star-shaped and have tubes about 6 inches long; they are produced with the greatest freedom and are sweet-scented. They are handsome ornaments in any garden, either as lawn plants, used in shrubbery border or as a hedge, for they make a splendid background for dwarf, bright colored plants. **Pkt. 5c.**

LYCHNIS.

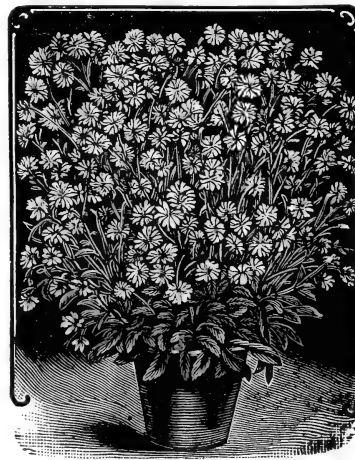

Handsome plants of easy culture, growing in any rich garden soil; for massing in beds and borders, blooming the first year if sown early; hardy perennials.

Burning Star. A blaze of scarlet brilliancy for months, star-like blossoms covering the dwarf bushy plants as with a cloud. Perfectly hardy and blooms even better the second season than the first. One of the most brilliant of garden flowers. **Pkt. 4c.**

Lychnis Chalcedonica White. This is a very ornamental hardy perennial; grows about two feet high and is covered during the Summer season with thousands of white flowers. **Pkt. 5c.**

Nicotiana Sylvestris.

Lychnis White.

JAPANESE IMPERIAL MORNING GLORIES

The flowers of these grand Morning Glories are as large as moon flowers, measuring from 4 to 6 inches across, with markings and colors never before seen in flowers. Some single, some double, and many with variegated and feathered petals and leaves. The flowers are borne by the hundreds; nothing among flowers can furnish a more beautiful sight than a screen, hedge or trellis of these Giant Morning Glories. **Mixed, all colors. Pkt. 5c.; oz. 20c.**

Double Japanese Imperial Morning Glory. These are very rare and beautiful, because they are **double**. They possess all the colorings and markings of the single varieties. **Pkt. 10c.**

New French Dwarf Marigold—Legion of Honor.

Moon Flower.

MOON FLOWER.

Rapid growing vines of great vigor, producing hundreds of flowers each night.

Noctiphiton. Pure white, large flowers. **Pkt. 4c.**

Leari. Beautiful azure blue. **Pkt. 5c.**

NEW FOUR O'CLOCK.

This variety blooms just as quickly and easily as the old-fashioned kind, and is **sweet scented**; it grows very rapidly and will cover a large surface. **Pkt. 4c.**

Mignonette White Spiral.

MIGNONETTE.

If sown at intervals during the Spring and early Summer, it will be in bloom till killed by the frost.

Giant White Spiral. Grows from two to three feet tall. Perfectly erect, spikes of bloom often measuring fifteen inches long. It is very showy in growth. **Pkt. 3c., 2 for 5c., 1-4 oz. 12c.**

Improved Machet. The finest yet known. Strong, bushy grower, bearing spikes of flowers in great numbers, which are very large and pyramidal shaped, and a very beautiful shade of red; extremely fragrant. **Pkt. 4c.**

Common Sweet. Very large flowers and delightfully sweet. **Pkt. 3c., 2 for 5c., 1-4 oz. 10c.**

Golden Queen. Pyramidal habit, yellowish flowers. **Pkt. 3c.**

MARIGOLDS.

These popular, bright, showy flowers only need the slightest care to do well and blossom freely.

New Marigold. Legion of Honor. Named so in France because it so exactly resembles the flag of the Legion of Honor. Flowers are bright and almost startling. Bright golden yellow with a deep velvety crimson-brown mark on each petal at the base. Easy to grow. **Pkt. 3c.**

Prince of Orange. The plant grows twelve to eighteen inches high, and produces large, brilliant, deeply imbricated flowers in great profusion all the season. The color is a pale straw-yellow, striped with a most intense shade of orange. **Pkt. 3c.**

Dahlia-Flowered. Grows two to three feet high; enormous double blossoms, in size and shape resembling the finest dahlias. **Pkt. 3c.**

French Mixed Colors. Small double flowers, rich dark shades, profuse bloomers. **Pkt. 3c.**

Sweet Peas.

SWEET PEAS.

Blanche Ferry. Earlier than most others, largest flowered, most perfect in form, most beautiful, most fragrant, compact and bushlike in habit. The plant throws up innumerable flower stems, each bearing three or four immense pink and white flowers. **Pkt. 3c., oz. 8c., ¼ lb. 20c., ½ lb. 30c.**

Brilliant. Bright scarlet flowers, borne three on a stem. The flowers retain their full brilliancy of color under the hottest sun. **Pkt. 3c., oz. 8c., ¼ lb. 20c., ½ lb. 35c.**

Pure White. Large pure white flowers of great substance, borne on long stout stems. **Pkt. 3c., oz. 8c., ¼ lb. 20c., ½ lb. 30c.**

Maid of Honor. A fine shaped flower of hooded form. Color white edged with lavender. **Pkt. 3c., oz. 8c., ¼ lb. 20c., ½ lb. 35c.**

Earliest of All. Grows 2 feet high and very free flowering. Color, pink and white, and are produced 10 days earlier than any other other variety. **Pkt. 3c., oz. 8c., ¼ lb. 20c., ½ lb. 35c.**

Stella Morse. This is unquestionably one of the loveliest of all Sweet Peas. The flowers are of largest size, faultless form, grow on long stem, with three or four flowers to the stem. Color, a lovely shade of deep cream which, as the flowers grow older, turns into the most delicate primrose with a faint rose-pink. **Pkt. 3c., oz. 8c., ¼ lb. 20c., ½ lb., 35c.**

Navy Blue. An entirely distinct color from any existing variety of Sweet Pea. Color dark blue, standards brilliant royal purple, wings pure violet. A most vigorous grower; stems bear from three to four flowers. **Pkt. 5c., 1 oz. 15c.**

Pink Friar. Color a soft carmine rose, delicately suffused on a white ground. Has been pronounced the most beautiful shaded variety in cultivation. **Pkt. 5c., ½ oz. 10c., 1 oz. 15c.**

Gorgeous. The most gorgeous in coloring yet produced; flowers of a very large size and borne in threes at the end of long, stout stems, color bright orange-pink shaded rosy lilac. **Pkt. 5c., 1 oz. 15c.**

Emily Lynch. The earliest Pea in existence; wings buff cream, and standards bright, rosy pink. **Pkt. 5c., 1 oz. 10c.**

One each of above named Sweet Peas 25c.

MIXED SWEET PEAS.

New Sorts Mixed. This mixture is made up of all new named varieties, and is extra fine. **Pkt. 4c., oz. 10c., ¼ lb., 25c., ½ lb. 35c.**

Fuller's Best Cheap Mixed. This strain, although not embracing the latest novelties, contains quite a beautiful assortment. **Pkt. 3c., oz. 8c., ¼ lb. 20c., ½ lb. 25c.**

Double Mixed Sweet Peas. Made up entirely of double named varieties. **Pkt. 5c., oz. 10c., ¼ lb. 30c., ½ lb. 50c.**

Red, White and Blue Mixed. Made up in equal proportions of the three colors, Red, White and Blue. **Pkt. 5c., oz. 10c., ¼ lb. 25c., ½ lb. 40c.**

DOUBLE NAMED SWEET PEAS

Double Butterfly. White shaded lavender. **Pkt. 5c., 1 oz. 15c.**

Double Bride of Niagara. Very fine form, color rose and white. **Pkt. 5c., 1 oz. 15c.**

Double Duke of Clarence. The very best of all doubles; rosy claret. **Pkt. 5c., 1 oz. 15c.**

Double White. Pure snow white, of great substance. **Pkt. 5c., 1 oz. 15c.**

Double Apple Blossom. Beautiful pink. **Pkt. 5c., 1 oz. 15c.**

Double Splendor. Superb rose, shaded with bright crimson. **Pkt. 5c., 1 oz. 15c.**

Double Black. The very darkest shade of red in Sweet Peas. **Pkt. 5c., 1 oz. 15c.**

1 Pkt. each of 7 Double Named Peas for 25c.

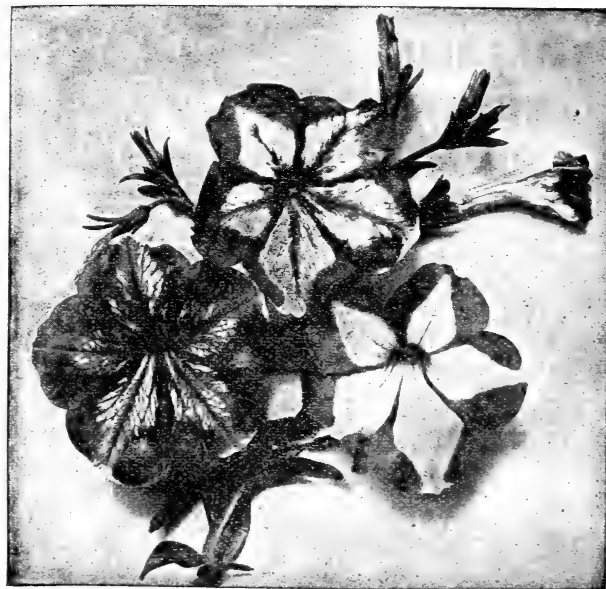

NEW CUPID SWEET PEAS.

White Cupid. This charming variety only grows from 6 to 10 inches high, making a dwarf, compact plant, often spreading over an area of from 10 to 15 inches. **Pkt. 5c.**

Pink Cupid. Growing from 6 to 8 inches high and shooting up stems about 6 inches long, which bear in full bloom at once from three to four handsome large flowers. **Pkt. 5c.**

"Beauty Cupid." The flowers are large, three to a stalk, the standards are a delicate rose color, whitening toward the edges, slightly streaked carmine at the base; the wings are suffused ruby-carmine. **Pkt. 5c.**

"Alice Eckford" Cupid. Flowers of medium size; the standards are rich, creamy white, suffused with flesh pink, the wings are silver-white, with a faint pink flush in the center. **Pkt. 5c.**

HOWARD NEW STAR PETUNIA

The Floral Novelty of 1902.

Their ground color is a dark crimson maroon, with a rich velvety texture, justly pronounced equal to that of the pansy. Showing through the ground color are violet veinings.

From the center starts the points of a five rayed star, which broadens half way up, narrowing to a point at the margin of the flower.

This star is a very light blush pink, some almost white, which deepens in color as it reaches the margin and finally blends with the maroon ground color. Over eighty per cent. of the plant from seed will produce the star markings. Others with veined and feathery markings on dark or light ground are not less surprisingly beautiful.

The plants are free growers, branching freely and attaining an average height of 18 inches by 24 inches in diameter.

They are remarkably prolific bloomers, single plants often having one hundred or more fully expanded flowers at a time.

We feel confident that in view of the universal praise of those who have seen these petunias, it will have the largest sale of any floral novelty that has been offered for many years. **Per Pkt. of 75 seeds 12c. 3 for 30c.**

Large Flowering Fringed Petunia.

GIANT PETUNIAS.

For outdoor decoration or house culture few plants equal the Petunia in effectiveness. They commence flowering early and continue a sheet of bloom throughout the whole season until killed by frost; easily cultivated, only requiring a rich soil and a sunny position.

New Hybrids. Striped and blotched; a magnificent strain, producing a great profusion of crimson and white flowers. **Pkt. 4c., 3 for 10c.**

French Tree. Grows in tree form; very handsome. **Pkt. 5c.**

Double Snowball. Very rare and scarce. Large double white flowers. **Pkt. 10c.**

Double Crimson. Large double flowers of a very intense scarlet. **Pkt. 10c.**

Double Fringed. All Petunias will not come double from seed, but this will produce as many double flowers as any in cultivation. **All colors mixed. Pkt. 8c.**

Ruffled Giants. This new race is the result of years of careful hybridizing and selection by one of the foremost Petunia specialists. The flowers are of extraordinary size and substance, with very deep throat, and distinguished from the large flowering fringed section by the deeper fringing and fluting, giving the appearance as if artificially ruffled. The colors are not surpassed by any other strain, ranging from the deepest plum-purple to the purest white. **Pkt. 10c.**

Double and Single Mixed. This mixture is made up of all the colors and character in the double, single and fringed varieties and is one of the very best that can be had. **Pkt. 5c.**

Shirley Poppy.

POPPIES.

There is nothing more graceful than the silky blooms of Poppies, and few flowers are easier to grow.

Fairy Blush. A lovely feathery variety, double, with fringed edges. Pure white with rose cream edge. **Pkt. 4c.**

Giant Snowdrift. Pure snow-white flowers. **Pkt. 3c.**

Giant Carnation Flowered. Double flowers, brightest colors, perfectly grand. **Pkt. 3c.**

Shirley. A lovely single Poppy with petals that seem stamped out of the most lustrous silk, and of the softest, most delicate colors or of the most brilliant hues, each flower widely margined with some other shade. No one can help admiring these beauties. **Pkt. 4c.**

Double and Single, all colors mixed. Fifty colors. **Pkt. 3c.**

New Hardy Poppy Bractæum. For permanent beds these brilliant, large flowering, hardy Poppies stand unrivaled. The flowers average from six to nine inches across, color orange scarlet, and are simply grand. The plants grow from three to four feet. **Pkt. 5c.**

STOCKS TEN WEEKS.

The most popular of German flowers; noted for their fragrance and range of color from snow white to dark maroon brown.

Early Ten Weeks. Twelve finest colors, mixed. **Pkt. 3c.**

Early Ten Weeks. Pure white. **Pkt. 3c.**

Ten Weeks. Crimson. **Pkt. 3c.**

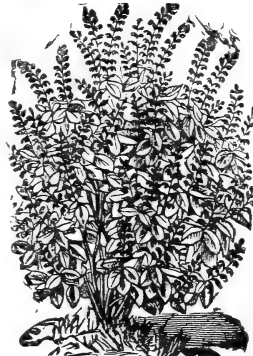

Giant Perfection, Mixed. Long spikes of large double flowers. **Pkt. 3c.**

SWEET WILLIAM.

The favorite flower of our grandmothers. One of the best edging plants for the border, bearing in early Summer large heads of the richest and most varied colors. Very fragrant and a favorite with everyone for vases and bouquets.

Improved Mixed Colors. Perfect in form, large in size, brilliant and varied in colors. One of the most delightfully fragrant plants we know of. **Pkt. 5c.**

SALVIA SPLENDENS.

One of the grandest plants in cultivation. A bed of them surpassing the finest scarlet geraniums in brilliancy and continuous bloom, the flower spikes measuring ten to twelve inches in length. **Pkt. 3c.**

Salvia Farinacea. The plants form dwarf, compact bushes, with long spikes of beautiful blue flowers, which make a charming contrast when grown with the scarlet described above. **Pkt. 4c.**

SCHIZANTHUS.

These beautiful "Butterfly flowers" are extremely easy to grow, and are among the most continuous bloomers we have. The flowers are large and brilliant, and very unique in form and color, the shape resembling the orchid very much. Colors: crimson, yellow, violet, white, etc. A grand pot plant, and for winter blooming we do not know of a plant that will prove more satisfactory. **Pkt. 4c.**

PANSIES.

Violet or Tufted Pansies.

The Pansy is justly—everywhere and with everybody—a very popular flower. Its modest and innate sweetness, with its almost human face, endears it to the heart of young and old alike. It gives an abundance of bloom until after severe frosts, endures our hard Winters with safety, and greets us in the early Spring with a profusion of bright blossoms. Pansy seed may be sown in the hot-bed or open ground; if sown in the Spring, get it in as early as possible, so as to secure flowers during the early rains. Seeds sown in a cool place in June or July, and well watered until up, will produce Fall flowering plants. To have good flowers, the plant must be vigorous and make a rapid growth, as it will in rich moist loam. Young plants give the largest flowers. Old worn-out plants should be replaced. If the plants come into bloom in the heat of the Summer the flowers will be small at first, but as the weather becomes cooler they will increase in size and beauty. They will flower better in the middle of Summer if planted where it is somewhat shaded from the hot sun, and especially if furnished with a good supply of water; but in almost any situation will give fine flowers in the Spring and Autumn.

Violet or Tufted Pansies. For years these hardy, tufted Pansies have been grown in England, where they are most extensively used for borders, but they were always propagated by cuttings. We have succeeded in securing a limited amount of seed. The plants grow in dense, compact little bushes, which are completely covered with their bright flowers from early Spring until late in the Fall. The colors range in all shades of white, pink, blue, yellow, violet and purple, as self colors or in combinations. It is a decorative plant of the highest order, and we feel sure it will soon be as universally grown in this country as it has been for years in England. **Pkt. 5c., 3 for 12c.**

Fairy Queen. One of the latest novelties. Brilliant sky blue; silver white margin; very showy. **Pkt. 5c.**

Madame Perret. Extra large flowers. Edged, marble and shaded blue; dark red and violet. One of the newest introductions. **Pkt. 5c.**

Peacock. A Pansy of superb and varied colors, most of them showing that glorious and luminous bronze-blue seen only in peacock feathers. **Pkt. 5c.**

Fancy Striped. A strain made up of various colors, all elegantly striped and variegated. **Pkt. 4c.**

Snow Queen. Large, pure white flowers. Fine for cemeteries. **Pkt. 4c.**

Yellow Bird. This is one of the grandest bedding Pansies known, being a clear deep yellow with no other marks. **Pkt. 5c.**

Victoria. Deep scarlet. The brightest and only red Pansy known. **Pkt. 5c.**

Emperor William. Fine large flower. Blue, with violet-purple eye. **Pkt. 4c.**

King of Blacks. Almost coal black, coming true from seed. **Pkt. 4c.**

President Carnot. The ground color is white, and each petal is almost covered with a rich, velvety blotch of dark violet-purple, leaving a broad white margin. Very fine flowering. **Pkt. 5c.**

Mammoth Butterfly. The flowers are very large, and are produced freely. In coloring they are varied—seldom two alike in a hundred plants. They are mottled and spotted, streaked and splashed, while the colors are mainly those rich reds, brown, chocolate, lavender, violet, purple, etc. **Pkt. 5c.**

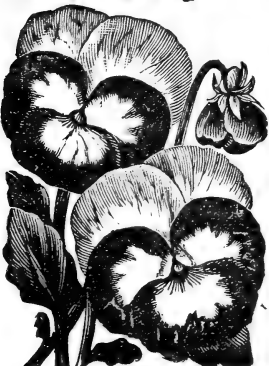

Sweet Scented Pansies. This lovely new class is the result of a hybridization or crossing of the Pansy with the Sweet Violet, retaining the delightful Violet perfume, with Pansy blooms two inches in diameter, of good substance and in many colors. They include pure white, yellow, black, maroon, orange, lavender, striped, blotched, etc. **Pkt. 5c.**

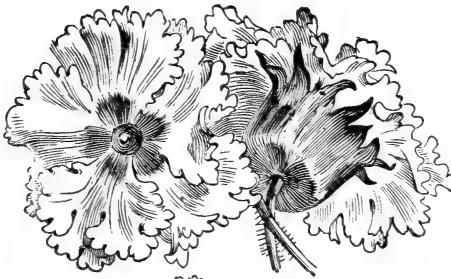

Fuller's Giant Perfection, Mixed. Flowers three to three and one-half inches across. Made up of all large flowering kinds and most profuse bloomers. **Pkt. 3c., 1/8 oz. 25c., 1/4 oz. 40c.**

Fuller's Superb Mixed. Our superb mixture still retains its superiority above all others; and for range of colors and flower-producing qualities it cannot be equalled. **Pkt. 3c., 1/8 oz. 25c., 1/4 oz. 40c.**

Mixture of Scarlet and Red Pansies. Red and scarlet flowers. It is made up of such varieties as Meteor, Red Ridinghood, Cardinal, Fiery Faces, and also some special selections we had made for this mixture by several Pansy specialists. A bed of these Pansies presents a striking and beautiful effect. **Pkt. 5c.**

One Pkt. each of 16 Pansies, 50c.

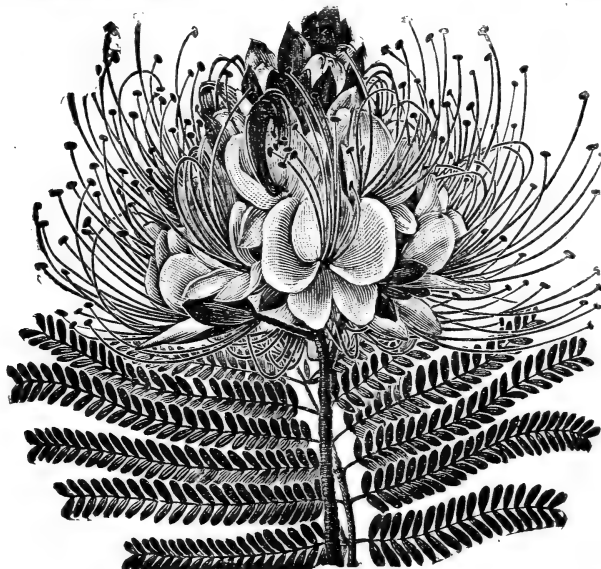

Primula (Chinese Primrose).

**Pyrethrum.**

This is the well known "Golden Father" that forms a mass of tufted golden foliage that is the last flower to succumb to the frost. Flowers are double white, and if seed is started early will bloom profusely the first year. It is extensively used as borders. Perfectly hardy.

Aureum. Golden leaved. Pkt. 4c.

Double and Single Mixed. Large flowers, all hardy. Pkt. 5c.

Bird of Paradise.

PRIMULA

(Chinese Primrose.)

The Chinese Primrose is the brightest and most free flowering of all pot plants for growing in the house during the Winter. It does well in a cool room and will bloom freely in a shady window, where most flowers will not thrive. Sow seed in shallow boxes of light soil, barely covering seed from view, and it is best to keep box shaded during the hottest part of day. The earth should be moist always—neither wet nor dry at any time. Keep plants in cool, shady place during Summer months

- Primula, Pure White.** Large trusses of white flowers. . . Pkt. 10c.
Primula, Pink. Fine fringed flowers of pink. " 10c.
Primula, Red. A very brilliant red. " 10c.
Primula, Blue. New and beautiful. " 10c.
Primula, Single Mixed. All colors. " 10c.
Primula, Double Mixed. All colors. Very choice. " 20c.

Baby Primrose (Forbesii). One of the freest flowering Primulas. The seed comes up very quickly and the little plants throw up flower stalks when only a few weeks old, which are shortly covered with a never-ending profusion of sprays of beautiful rosy lilac flowers. Pkt. 15c.

New Salpiglossis.

Emperor. The Salpiglossis is one of the greatest favorites among annuals. It holds this high place because of the ease with which it is grown, the beauty of its almost orchid-like flowers, and its continuous habit of blooming, the flowers being produced during the whole Summer. This new variety shows marked distinctions in both its flowers and habit. It forms only one leading stem, which often grows as thick as one's finger and bears on its end a bouquet of the most beautiful flowers. Every one of them is richly veined with gold and much larger than those of the old type. There is as much difference between the "Emperor" variety and the old type as there is between the improved varieties of petunias and the common petunias. The throat is wide open and short. The edge of the flower is not so deeply incurved as with the old type, which gives the flower a rounder shape. In short, this novelty is so remarkably beautiful that experts both in this country and abroad pronounce it something really extraordinary. Pkt. 5c.

Salpiglossis Grandiflora. The metallic gloss and distinct veining of the petals present almost the appearance of jeweled enamels. **Mixed Colors.** Pkt. 5 cs.

Picotee Pinks.

These Pinks are extreme fragrant and hardy. They are frequently called

Hardy Carnations, and make one of the grandest border plants, especially where borders are desired to remain from year to year.

Mixed Colors. Large flowering. Pkt. 5c.

Bird of Paradise.

The color of the flower of this grand novelty is a golden yellow, white, red, etc., measuring two and a half inches across, with shape as shown in illustration, and are produced in very large trusses. The most beautiful part of the flower is the large pistils, which are spread out in fan-like form, and are of bright crimson color. The foliage is also highly decorative, reminding one of a very delicate acacia. This is the first year that it has been offered under colors. If the seed is started early it will produce blooms in great profusion the first year. One of the great features about it is that it may be transplanted in the Fall for Winter blooming in the house.

- Clear Yellow.** Per Pkt. 10c.
Bright Red. " 10c.
Mixed all Colors. " 10c.

Salpiglossis-Emperor.

POLYANTHA or FAIRY ROSES.

In Bloom Two Months After Planting.

These may well be called "Fairy Roses," for they bloom when scarcely two months old. They flower on little shoots from 3 to 5 inches high, and with age they increase in number until a plant a foot and a half tall is covered with these beautiful little midgets. Colors, white, pink, crimson, etc. A grand plant for pot culture and perfectly hardy outside, increasing from year to year. Start seed early in the house for outdoor blooming. **Pkt. 5c.**

Plants of Fairy Roses. We have a fine stock of plants of these little **Baby Roses**, which will begin blooming almost immediately and produce hundreds of fairy-like flowers. **10c. each, 3 for 25c., 6 for 50c., 12 for 90c.**

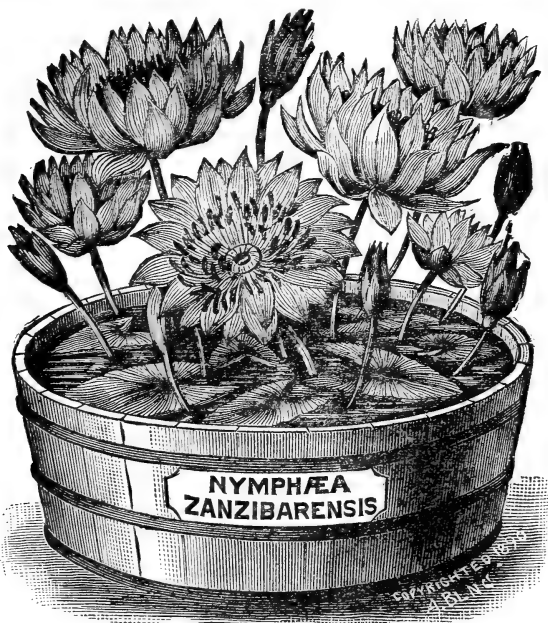

PERENNIAL PEA.

No praise can be too high for this lovely iron-clad vine, that blooms constantly from early summer until late autumn. Plants a picture of vigor and healthfulness, bearing a profusion of long-stalked clustered flowers, white, pink and deep rose in color, each flower an inch or more across. It is strange that they are so rarely seen, for they are easily grown, perfectly hardy and so beautiful that we have never yet seen a person who did not admire their cheerful flowers. Four to six feet high. **Mixed, all colors, 5c.**

Perennial Pea, pure white. **Pkt. 5c.**

Perennial Pea.

RED, WHITE and BLUE WATER LILIES.

Few plants are much more attractive than these beautiful pond lilies; very fragrant and sweet. Grand combination of colors. **Three colors mixed, red, white, blue, Pkt. 5c.**

PLANTS. We have a nice lot of plants of hardy Water Lily which are sure to bloom. **15c. each, 2 for 25c.**

Star Phlox.

PHLOX DRUMMONDI.

The various varieties of this flower are noted for extreme richness of color, profuseness of blossom and length of duration in bloom; of first-rate habit, and whether in clumps or masses look equally beautiful. It is one of our finest annuals for beds, borders, etc. Plant in light, rich loam.

Phlox, Drummondii, Grandiflora. A bed in bloom dazzles the eye with its brilliancy, and the different colors produce a beautiful effect. Sow seed in the open ground early. **Pkt., mixed colors, 4c.**

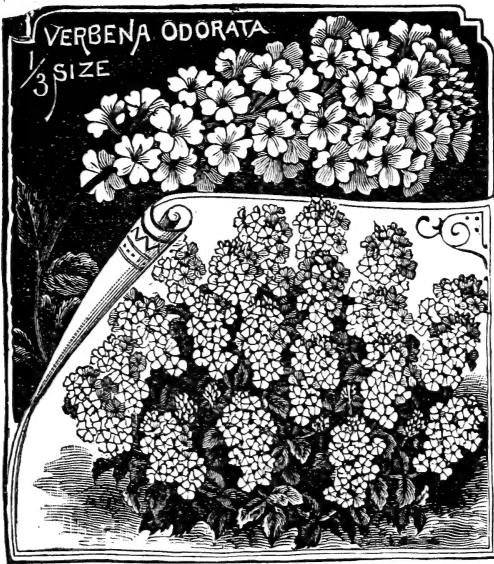

Star of Quedlinburgh, Cuspidata. Flowers curiously formed; more than 30 colors, mixed. **Pkt. 5c.**

Double Yellow. Large double flowers. **Pkt. 5c.**

Alba. Pure white, one of the finest. **Pkt. 5c.**

Mixed Varieties. The very finest of all colors. **Pkt. 3c.**

Hardy Perennial Phlox. Magnificent hardy flowering plants growing into strong bushes from two to three feet high, bearing immense heads of large waxy flowers of the most lovely shades of color. **Pkt. 10c.**

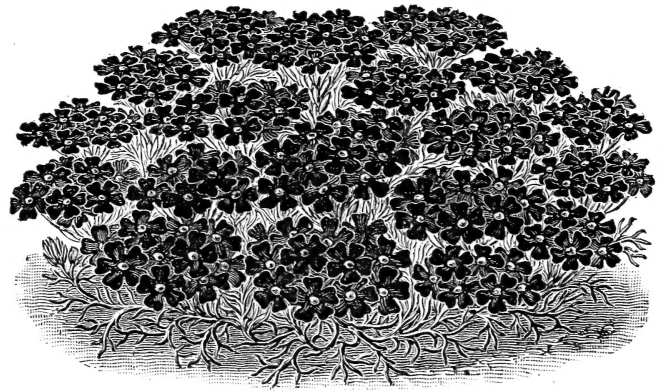

VERBENA.

Verbena Mayflower. This truly wonderful seed novelty so closely resembles the **Trailing Arbutus** in shape and color of flower and fragrance, that it may well be called the **Mayflower**. It is of the most pronounced trailing or creeping habit; a single plant will often cover a space of from 4 to 6 feet in diameter, and will be covered from early Summer until late Fall with hundreds of clusters of the most delightfully fragrant light pink flowers. **Pkt. 5c.**

Verbena Odorata. This lovely Verbena possesses great merit over other varieties, and they are such important ones that it will become a necessity to every garden. It is so hardy, seed can be sown in the open ground early in the Spring, where they will quickly germinate, and in a few weeks be in bloom and give a great profusion of beautiful blossoms all Summer. The blossoms instead of being in *clusters* like other sorts, run up into *spikes*, usually 3 or 4 inches long, as shown in the cut. It is very sweet scented. Color is pure white. **Pkt. 5c.**

Verbena Hybrida, Mixed. A splendid collection of best-named varieties and colors. Free flowering. **Pkt. 4c.**

MOSS VERBENA.

This new Verbena produces a mass of fine, moss-like foliage, and as the branches spread out over the ground in all directions a lovely carpet of mossy green is formed, above which are borne the delicate clusters of purple-blue blossoms in the wildest profusion. The effect is most charming. It is more hardy and robust than most Verbenas, and blooms in a very short time. It is novel and beautiful. **Pkt. 5c.**

ZINNIAS.

Are very free and robust growers and produce all Summer an abundance of rich bloom, and each flower remains perfect for weeks. Weather conditions make no difference to them.

Mammoth Zinnias. A great improvement over all others. Flowers double and single. Colors dazzling. **Pkt. 5c.**

Fairy Zinnias. Named so because the flowers are so small, also the plants. **Pkt. 5c.**

Double Mixed, extra large double flowers. **Pkt. 3c.**

Zebra or Striped Zinnias. Very curiously marked. Many colors on each flower. **Pkt. 5c.**

WALKER'S FERTILIZER.

It has no odor whatever, and can be used dry or dissolved in water for sprinkling. Use it and your flowers will flourish and their health will last.

Makes Flowers Flourish.

Flowers are like people. Their health depends upon their food. It must be *nourishing*, but not too rich to force growth and cause reaction. The one chemically correct flower food for house plants is Walker's.

Small size (feeds 25 plants 6 months), **25c.**; large size (enough for a year), **40c.** Sent prepaid.

SULPHO-TOBACCO SOAP. THE MOST VALUABLE INSECT DESTROYER KNOWN. . . .

This soap is the most effectual to kill all insects. It is made from a powerful form of tobacco gum, absolutely safe to handle, and will not injure the tenderest growth of plants. It is used by dissolving in hot water at the rate of one ounce to two quarts of water. With this water plants are sprinkled, syringed or sponged, and one or two applications will exterminate any kind of insect. Sure death to green or black fly, scale, mealy bug, red spider, etc. If used once or twice a month on plants they will never be troubled with insects.

Full directions with each can. 6-oz. Cans, postpaid, **30c.**; 2-oz. Cans, postpaid, **10c.**

STANDARD VEGETABLE SEEDS

BEANS (DWARF OR BUSH), Extra Early Red Speckled Valentine. One of the snap shorts. Very early, productive, tender and of rich flavor. Pkt. 3c., pt. 20c., qt. 35c.

Best of All. Well known as one of the best green-podded varieties; the long pods are fleshy, stringless and of rich flavor. Pkt. 3c., pt. 20c., qt. 35c.

Burpee's Bush Lima. The only true form of Bush Lima. Don't fail to plant it. Pkt. 3c., pt. 30c., qt. 50c.

BEANS (POLE OR RUNNING), King of the Garden Lima. The most productive of all Limas. Immense pods, fine quality. Pkt. 3c., pt. 25c., qt. 45c.

New Stringless Green Pod. The first and only Stringless green pod bean. The earliest and best of all dwarf green podded varieties. Pkt. 3c., pt. 25c., qt. 45c.

New Early Black Lima. Ten days to two weeks earlier than any other Lima. Delicious flavor. Pkt. 3c., pt. 25c., qt. 45c.

BEETS, Improved Blood Turnip. Unequaled for table use; flesh deepest blood red. Pkt. 3c., oz. 10c., ¼ lb. 15c., 1 lb. 45c.

Eclipse. Fine grained and sweet, globe shaped, very smooth. One of the best. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 55c.

Edman's Early Turnip. Rich bronzed; handsome turnip-shaped Beet; very tender. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 55c.

Long Smooth Blood Red. One of the best late varieties; keeps well; can be sown up to the middle of June. Pkt. 3c., oz. 10c., ¼ lb. 15c., 1 lb. 40c.

Lane's Improved Imperial Sugar Beet. Enormously productive. Fine for stock feeding. The best sugar beet. Pkt. 3c., oz. 10c., ¼ lb. 15c., 1 lb. 40c.

CABBAGE, Burpee's Original Surehead. Celebrated as the surest heading and best main crop Cabbage. Fine for family or market purposes. Pkt. 4c., oz. 20c., ¼ lb. 60c., ½ lb. \$1, 1 lb. \$2.

Early Jersey Wakefield. A superb early variety; remarkably hard and solid. Pkt. 4c., oz. 20c., ¼ lb. 60c., 1 lb. \$2.

Superior Large Late Flat Dutch. One of the best late varieties; large, solid, broad and flat. Pkt. 4c., oz. 15c., ½ lb. 40c., 1 lb. \$1.50.

CARROT, Improved Long Orange. Uniform, smooth and of large size. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 65c.

Danvers Half Long Orange. Produces enormous crops; very smooth and handsome. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 65c.

CAULIFLOWER, Extra Early Snowball. Solid pure white heads of splendid quality. Pkt. 5c., ¼ oz. 60c., ½ oz. \$1.00, oz. \$1.75.

Our Best Early. This is the very best early Cauliflower in cultivation; snow white. Pkt. 5c., ½ oz. 85c., oz. \$1.50.

CELERY, White Plume. Famous as one of the earliest and best. Pkt. 4c., oz. 20c., ¼ lb. 60c., 1 lb. \$2.

New Golden Self-Blanching. The best early Celery. Perfectly solid, crisp and of delicious flavor. Pkt. 4c., ½ oz. 20c., oz. 35c., ¼ lb. \$1, 1 lb. \$3.50.

New Giant Pascal. The best Winter Celery. Thick, solid, entirely stringless, and the best keeper. Pkt. 4c., oz. 20c., ¼ lb. 60c., 1 lb. \$2.

EGG-PLANT, New York Improved Purple. Flesh white, of splendid quality; very productive. Pkt. 4c., ½ oz. 20c., oz. 35c., ¼ lb. \$1, 1 lb. \$3.50.

SUGAR CORN, Mammoth. The very best late sort. Pkt. 3c., pt. 20c., qt. 35c., pk. \$1.50, ½ bus. \$2.

The Cory. There is no better variety for table or market use. Pkt. 3c., pt. 20c., qt. 35c. By Express, \$1 per pk., \$3.50 per bush.

Stowell's Evergreen. The best medium variety for canning and market. Pkt. 3c., pt. 20c., qt. 35c. By Express, \$1 per pk., \$3 per bush.

London Long Green. An extra good variety; firm and crisp. Pkt. 3c., oz. 10c., ¼ lb. 25c., 1 lb. 70c.

White Pearl. Solid, tender and crisp; splendid for slicing. Pkt. 3c., oz. 10c., ¼ lb. 30c.

Improved Early White Spine or Arlington. Cannot be surpassed for marketing or pickling purposes. Pkt. 3c., oz. 10c., ¼ lb. 25c., 1 lb. 70c.

Early Green Prolific or Boston Pickling. Needs no praise; immensely productive. Pkt. 3c., oz. 10c., ¼ lb. 25c., 1 lb. 70c.

LETTUCE, California Cream Butter. Quality very rich and buttery to the taste; heads short and solid. Pkt. 4c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.50.

Early Curled Simpson. One of the earliest. Pkt. 3c., oz. 10c., ¼ lb. 30c., 1 lb. \$1.

Hard Head. Grows rapidly and heads early; flavor sweet and buttery. Pkt. 3c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.50.

Hanson's Improved Head Heading. Sweet, crisp and tender; grows to large size. Pkt. 3c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.25.

MUSKMELONS, The Emerald Gem. Superb quality; unequaled by any other variety; ripens early. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 65c.

Hackensack. Large size and uniform; very productive and of delicious flavor. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 60c.

Montreal Green Nutmeg. One of the best. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 60c.

Paul Rose. Very early and surpasses all melons as a keeper, and no other melon equals it in firmness. Pkt. 5c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.35.

WATERMELON, Delaware. Fully ten days earlier than Ironclad; solid, luscious and sugary. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 60c.

Mammoth Ironclad. The best all-around melon in cultivation. Grows to enormous size; Pkt. 3c., oz. 10c., ¼ lb. 20c.

Cuban Queen. Famous for its superior merit; will grow anywhere; ripens early. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 60c.

ONIONS, New Mammoth Silver King. A superb Italian onion that grows to immense size the first season from seed; skin silvery white; flesh snowy white. Pkt. 3c., oz. 25c., ¼ lb. 75c., 1 lb. \$2.50.

The Prizetaker. Most famous of all Onions. Immense size, sometimes weighing 4 to 6 pounds each. Flesh pure white, fine grained. Pkt. 3c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.50.

Best Yellow Globe Danvers. The best all-around Onion for general planting. Pkt. 3c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.50.

Large Red Wethersfield. The best large red Onion; flesh purplish white, fine grained and highly flavored. Pkt. 3c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.50.

PARSLEY, Emerald or Extra Curled Dwarf. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 65c.

PARSNIPS, Long Smooth or Hollow Crown. Tender, sugary and considered the best for general cultivation. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 50c.

PEPPERS, Golden Upright. Undoubtedly the best yellow Pepper; flavor mild and pleasant. Pkt. 3c., oz. 25c., ¼ lb. 75c., 1 lb. \$2.50.

Ruby King. Bright ruby red color; flavor mild and pleasant. Pkt. 3c., oz. 25c., ¼ lb. 75c., 1 lb. \$2.25.

PUMPKINS, Golden Oblong. Splendid Pie Pumpkin. Flesh light yellow, quality the best. Pkt. 3c., oz. 10c., ¼ lb. 30c., 1 lb. \$1.50.

Genuine Mammoth. The Melon that causes much astonishment at country fairs, often measuring 3 feet in diameter and weighing 150 to 200 pounds. Splendid quality. Pkt. 3c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.50.

PEAS, McLean's Little Gem. Truly a gem! productive, wrinkled, and of delicious flavor. Matures in fifty-four days; Pkt. 3c., pt. 25c., qt. 40c., peck, \$2.00.

Stratagem. Grows about two feet, and is literally covered with immense pods, many five and a half inches in length. Pkt. 3c., pt. 20c., qt. 40c., peck, \$2.00.

American Wonder. Grows eight to ten inches and is earlier than other varieties; ready for use thirty to thirty-five days after planting. Pkt. 3c., pt. 25c., qt. 45c., peck, \$2.00.

Alaska. The best of all-round varieties, and very early. The whole crop matures at almost same time. Pkt. 3c., pt. 25c., qt. 45c., peck, \$2.00.

RADISHES, Early Round Dark Red. One of the best extra early varieties; crisp and firm. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 55c.

Early Long Scarlet Short Top. One of the very best of the old well-known sorts. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 55c.

New Long Cardinal. Extraordinarily early, being fit for use twenty-five days after planting; finest quality. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 60c.

SQUASHES, Early White Bush Scolloped or White Patty Pan. Well known. Pkt. 3c., oz. 10c., ¼ lb. 20c., 1 lb. 50c.

Fordhook. One of the best; all-the-year-round Squash. Pkt. 3c., oz. 10c., ¼ lb. 25c., 1 lb. 75c.

Hubbard. The standard Winter Squash. Pkt. 3c., oz. 10c., ¼ lb. 25c., 1 lb. 75c.

TOMATOES, Extra Early Advance. One of the earliest; very handsome, large, red fruit. Very prolific. Pkt. 4c., oz. 25c., ¼ lb. 75c., 1 lb. \$2.50.

New Matchless. Known everywhere as the best red Tomato for family and market use. Pkt. 4c., ½ oz. 20c., oz. 35c., ¼ lb. \$1.00, 1 lb. \$3.50.

Wallabout. One of our own introductions, and one of the very best tomatoes in the market; flesh solid, fruit round, large and will not rot on vines. Pkt. 5c., oz. 30c., ¼ lb. 75c., 1 lb. \$2.50.

TURNIPS, Breadstone. Flesh white, tender and fine grained. Cooks in fifteen minutes. Pkt. 4c., oz. 10c., ¼ lb. 30c., 1 lb. \$1.00.

Early White Dutch Strap Leaved. An early variety; flesh mild and juicy. Pkt. 4c., oz. 10c., ¼ lb. 20c.

Improved Purple Top Yellow Ruta Baga. A heavy cropper and good keeper; the best. Pkt. 4c., oz. 10c., ¼ lb. 20c., 1 lb. 60c.

Palms.

No collection of plants is complete without Palms. Their bold, majestic, yet graceful foliage, lends a grandeur and magnificence that cannot be obtained by any other class of plants, and no decoration, whether in hall, conservatory, sitting room or piazza is complete without them. The varieties which we show true to nature on cover are the very best for ordinary culture. Succeeding under all conditions and as plants live to a great age and increase in size and beauty each, once you have a collection they will last you a lifetime.

Filifera or Weeping Palm. This plant needs no petting or skill to grow. It flourishes with any treatment in any location in the house, porch or outside. The leaves are fan-shaped, beautifully cut and draped with a silk-like filament along the segments of the leaves. The plant is a compact grower and will make a grand ornament during Winter. **Plants, 15c. Extra size, 25c. Seed, per packet, 5c.**

Cocos Weddelliana. This beautiful palm is unquestionably the most elegant and graceful in cultivation. It is admirably adapted for the centers of jardinières and fern dishes, as it retains its freshness for a long time, while for dinner-table decoration it is unexcelled, and should be in every collection. **Large plants, 12 to 15 inches, 30c. each. Extra size, 60c.**

Areca Lutescens. One of the handsomest and most useful palms for house culture, to which it adapts itself readily. Once established it makes a regular growth, and if given a fair amount of light, it will prove superior to very adverse conditions. Its beautiful leaves are pinnate and gracefully arched, rich shining green, and very firm in texture. The stems and sheathing petioles are perfectly smooth, as if polished, yellow in color, mottled with black, forming an elegant contrast with the deep green. **Price. Strong plants, 15c., extra size, 50c.**

Latania Borbonica. The Chinese Fan Palm, from which the palm-leaf fans of commerce are made. The most popular palm in cultivation for decorative work; stands neglect well and also a considerable amount of cold. If grown in partial shade while young the leaves will be of a richer, darker green. **Price, strong plants, 15c. each, extra size 40c.**

Kentia Belmoreana. The Kentias are the hardiest in cultivation, and give better satisfaction as a house plant than any other varieties. They are of slow growth, and are not affected by the dust and dry atmosphere of the house, and were we to select one Palm only, it certainly would be a Kentia. **Price, strong plants, 20c. each, extra size 60c.**

One each of the 5 Palms by mail postpaid for 80c.; one each of the 5 Palms, extra size, \$2.00.

ASPARAGUS NANUS.

JAPANESE FERN BALL.

JAPANESE FERN BALL.

For the window, the drawing-room, or suspended from the chandelier over dining table or for use in fern dishes. It will surprise and delight you.

This novelty from Japan we introduced in 1899, and is one of the most satisfactory house ferns ever offered. These balls come in a dormant condition. They average about eight inches in diameter in the dry state and grow to spread about twice this size. The centre is moss, covered with fern roots in a very ingenious manner, looking like a ball of small roots twisted together. After watering they start into life and in a short time are covered with a mass of beautiful green foliage. If desired they may be allowed to dry up, which is very convenient when a person goes on a summer vacation. They may be started again by simply watering as before. When growing they should be watered two or three times each week. If desired they may be cut in halves and placed in a fern dish. **Price, 75c. each, 2 for \$1.25.**

ASPARAGUS PLUMOSUS NANUS or Lace Fern.

Beautiful on account of its light feathery growth, which very much resembles lace. The graceful dark green foliage surpasses the Maiden Hair Fern in delicacy of texture, and it is without a doubt the best plant for training similar to our illustration that has yet been introduced. **Price, plants, 20c. each, 2 for 35c. Seed, per pkt., 15c.**

ASPARAGUS SPRENGERI.

More popular than the Smilax. Has no equal as an evergreen plant. For pots, vases or hanging baskets it stands without a rival, as it droops most gracefully, sending out numerous feathery fronds, which within the short space of a year make a growth of from 4 to 6 feet. It remains fresh and green throughout the year, and being a strong, vigorous grower, resists all diseases. It produces small white flowers, which are followed by bright red berries, which make a beautiful contrast with the dark green foliage. One of the very best Church, Christmas or Easter decorations. **Strong plants, 20c. each, 2 for 35c.**

Seed. Plants grow very quickly from seed, and soon make handsome specimens. **Package, 10c., 3 for 25c.**
